COMPETITION RULES

EMAP IMAGES staff, families, friends and anyone they know cannot enter competitions. Still, neither can the people offering the prizes, so that's fair. Mind you, the rules don't say anything about pets not winning, so my Sister's cat, Jasper, could still enter. Probably.

THE OBSCURE BIT

Hey, all you rotten so-and-sos going out and building places to live on our soft fruit bushes, just pack it in. Ok. Thanks to you we're out of the World Cup...

Greetings, and welcome to this rather smart issue of MEAN MACHINES SEGA. With Valentine's Day out of the way, we're obviously buried under all the cards our admirers have sent (yeah, right), but have fought valiantly to ensure this issue is even better than our past efforts. Thus, not only do we boldly go where no man has gone before in our exclusive Star Trek: Next Generation preview, but we also unveil Core's superb Chuck Rally and EA's Syndicate in all their glory. On the review front, things are a little quiet, but the Mega-CD front is bustling with the likes of Dracula Unleashed and Mystic Mansion keeping us busy and finally showing us what the Mega-CD can do.

Before I sign off and let you get on with this month's excellent issue, I'd just like to send a big hoorah to the chaps at Codemasters who have announced a series of carts for just over twenty quid. Nice one lads, let's hope the others follow suit...

STEVE

FACIALLY-CHALLENGED

It has to be said that some of the people at EMAP are pug-ugly. Not us, of course, because we're all dead dreamy and stuff. In fact, there are certain members of the EMAP staff who are so facially-challenged they could be ugly for England. However, we reckon that there are bound to be people even uglier than them. Thus, if you know somebody who could curdle milk just by looking at it or even if you could do it yourself drop us a line and photo, you could even win a prize. Perhaps. Send your pics to:

STRANGE BUT TRUE

This picture of a rather strange device landed on Steve's desk the other day, and we just felt that we had to share it with you. Tee V Golf is a unit which plugs into the American Genesis unit and allows the player to play the likes of PGA Tour and its sequel using a specially-created light-sensitive golf club! Just think, instead of pressing the B button to time your shots to perfection, you can actually swing like the pros! It's doubtful that it'll ever see the light of day over here, but doubtless several thousand parents and their ornaments are breathing a sigh of relief.

⚠ Apparently when ladies tee-off with the 'Tee V Golf' they're allowed to stand 10' closer to the screen.

RIAL

FIVE URBAN MYTHS

Ever heard of an urban myth? It's a story which a mate will tell you, which has always happened to a mate of a mate, or a distant relative twice-removed. If you've ever heard these, you'll know what we mean...

1. The woman in a cinema eating Kentucky Fried Chicken. When she's finished and leaving the cinema, people scream because she's got blood all around her mouth. Apparently, she'd eaten a rat which had fallen into a deep fryer and had been served by accident. Yeah, right.

2. Man on a train craps himself. Seeing a men's wear store just next to the station, he runs into the shop and buys the first pair of kecks he can find. Grabbing the bag, he gets back on the train and throws his skiddy pants and trousers out of the window. On opening the bag, he finds a cardigan...

3. A couple return from their holiday to find their flat completely empty thanks to some rather efficient burglars. On searching the place, all they find left are their toothbrushes and a camera. After retiring for the night after brushing their teeth, they notice the camera has been used and hit upon the idea of developing the film for clues as to what the burglars may look like. When the film is returned, the pictures show two rather hairy bums with the toothbrushes inserted into them!

4. A couple of newly-weds and their dog move into their new house. As they're busy unpacking, their dog comes back with a dead rabbit in its mouth. Spotting next door's empty hutch they panic and head off into town to buy an identical replacement. Waiting until its dark, they put it in the hutch thinking they've got away with it. Next morning, they're wakened by the neighbours' kid screaming about their rabbit. Rushing down to see what all the commotion is about, the kid's Dad explains that the little mite was rather shocked to see Flappsy back as they'd only buried it yesterday!

5. A school's ugly duckling is invited on a date by the local hunk who says he'll pick her up later that night. As she's rather nervous, her bum's producing a series of particularly vile anal announcements. As he returns to the driver's seat after opening the door for her, she lets one go and quickly opens the window to waft it out. As he gets in, he then proceeds to introduce her to the other couple in the back of the car.

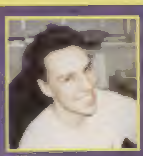
AND FINALLY...

Claire and Lucy have a special message for the odious 'Clive Fogelman' who sent us a charming little missive (the contents of which cannot be described in a family magazine) — "It would take a lot more than a Megadrive, matey".

THE TEAM

"You must remember this. A kiss is just a a kiss." (what crap). Having got Valentine's Day out of the way and being forced to listen to just how many cards all the girls in the office got, we thought we'd share our first romantic experiences with you. Well, the first kisses anyway...

STEVE 'MANGLED MOLARS' MERRETT



"My first snog was when I was about eleven or twelve, and stood a mere 4' 10" in my white-socked feet. It was at a school disco with a girl called Catherine who towered above me and, when we were kissing, her mouth was so much bigger than mine that her teeth scraped along the side of my molars! And she had a brace which sliced my gums open, too! Needless to say we weren't an item for long..."

LUCY "ALLO 'ALLO' NICKMAN

"I was eleven and got off with a French exchange student at the school disco. He asked me to go with him for a walk and stuck his horrid pudgy lips all over my face. I was having real trouble breathing because of his clamped kisser, and then he stuck his tongue down my throat! All this and garlicky breath, too hardly the most romantic thing I've experienced..."

CURRENT FAVE GAMES:COLUMNS 3, CHAOS ENGINE, SYNDICATE

OZ 'EATEN ALIVE' BROWNE

Oz was nineteen when his clash of dentures took place — with a girl called Carolyn. "The setting was perfect", says our Romeo Art Ed. "The stars were shining, and my stomach went all funny as she moved closer." Sounds idyllic. "She was like a flippin' cannibal, though," he continues, "and was so vicious that I thought she was gonna eat me!"

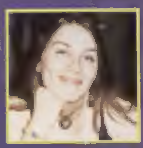
CURRENT FAVE GAMES:STREET FIGHTER 2

ANGUS 'CRADLE-SNATCHER' SWAN

Cradle-snatcher Gus was fifteen when he was dating a girl called Rosalyn three years his junior. "When I kissed her, she got a vice-like grip on my teeth like the Alien in the films, and was grinding away at the back of them. After this, I thought that was the way everyone kissed and promptly smashed the teeth of all the girls I dated afterwards!"

CURRENT FAVE GAMES:SUBTERRANIA, GUNSTAR HEROES, SONIC 3

CLAIRE 'PRIM' COULTHARD



"I was going out with this boy called Trevor for two days and he offered to walk me home. When we got there he wanted a kiss, and I said no and he went off in a huff. At school the next day, though, he'd obviously told people because there were horrible things written about me being frigid on the blackboard..."

NANKY-PINKIE

Could this be the Megadrive's answer to Chitty-Chitty-Bang Bang? Pinkie, the newie from Tengen, stars a cutesy pink alien who tours a number of alien-filled stages in a Chitty-style vehicle From the relative safety of the driver's seat, he can punch, jump and generally steamroller the many foes he faces as he searches for the end of the stage The game is being developed by Millennium for Tengen and very little exists aside from a few sketches and the basic sprites

SEGA'S SATU

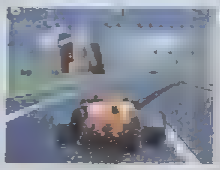
- SATURN

After months of speculation, MEAN MACHINES SEGA can finally reveal the exact specifications of Sega's forthcoming Saturn machine Despite initial reports that the machine is solely CD-based, the Saturn in fact can house both cartridges and CDs, although the machine's huge memory base means that it will be able to store more than the Mega-CD so annoying loading pauses won't be a problem In addition, the machine's power and speed comes via its two main RISC-based CPUs making it twice as powerful as, say, Acorn s Archimedes machine! This is where the element of confusion regarding whether

the machine would be 32 or 64-bit came from Both RISC processors are 32-bit, but two of these still don't double its power In terms of graphics, the Saturn can produce 16,777,216 colours, of which 2048 can be produced at any one time and if you thought Virtua was looking



impressive, the machine can display up to moving 800,000 polygons at once, each of which can also be shaded without a loss of speed

A source also told us that the machine is powerful enough to

In terms of price, Sega of Japan are probably looking somewhere in the region of 80,000 Yen (roughly £450 also it may cost more in the UK). Similarly, we have also been led to believe that the games will cost in the region of 30,000 Yen (around the £140 mark) although this is subject to change

Konami's Super NES classic, Contra (AKA Super Probotector) is Megadrive-bound – and not a moment too soon if you ask us! A one or two-player game, Contra pits the game's gun-toting heroes against all manner of alien beasties as they pelt across a series of scrolling stages. Contra is a classic Super NES title, and early reports state that the Megadrive version is going to be equally good. However, the Nintendo game's rotational-scrolling parts can't be done on the Megadrive, so something even more special is being planned. You'll have to keep an eye out for our exclusive Work In Progress in the next few months.

Having recovered from the disappointment of his first game, Bubsy Bobcat is about to show his face again in... you've guessed it, Bubsy II. The plot sees Bubsy coming up against an evil pig called Oinker P. Spamm and his brainbox sidekick, Virgil Reality who have teamed together to create the ultimate theme park – The Amazatorium. However, behind their apparently innocuous plans lies an agenda for world domination, and Bubsy's niece and nephew are two of the first to enter park and never return. Thus, Bubsy enters the Amazatorium's five themed worlds in search of Oinker and his missing kin. In all, Bubsy II spans fifteen stages, but adds three sub-games, a two-player mode, and an arcade/adventure element to the mix. Can Accolade and Bubsy get it right second time round? Stay tuned.

- MEGADRIVE

Programmers have got all funny as they unveil a Megadrive conversion of their Amiga hit, Bill's Tomato Game (and, yes, a Tomato is a fruit), which is due for release later this year. The rather odd scenario tells of a young Tomato who has fallen in love with a similar squidgy red salad garnish, only to see her whisked away for sale at the local market. To rescue her from a fate worse than Pete Beale, eighty danger-filled screens must be traversed. Each screen starts with Tommy (for want of a better name) propelled into action by a plunger system. However, to reach the other side of the screen, he must use carefully-positioned fans and trampolines to blow him across gaps and bounce him onto higher ledges. And if you're wondering why it's called Bill's Tomato Game, it's because the guy who programmed is called Bill. Funny that.

WORK IN PROGRESS

Core continue their plans for Mega-CD domination as they add the starter motor to a game which could well end up being the Sega equivalent of Nintendo's Super Mario Kart. Steve Merrett went along for the ride...

CHUCK RALLY

ROCKY RACERS

With Sega's conversion of Virtua Racing set to corner the 'serious' race game market, Core Design are aiming to fire another arrow into Nintendo's heart with their rival to the Big N's Mario Kart – Chuck Rally! Mentioned briefly in issue 17, Chuck Rally is a one or two-player race game which sees Mr Rock and his mates taking to the Neolithic roads in their chase for cute galore. Set just after the events of Chuck Rock 2, an eccentric millionaire by the name of Millstone Rockafella has organised a seven-stage race across town, with the winner winning two million pebbles and the contract to manufacture Rockafella's new 'Boulderdash Bike' — another sure-fire way to packet wads of dosh.

Having seen his car-making factory fall on harder times, Chuck would find the cash and contract rather useful — so would half the town! Thus, with his club-wielding offspring in his sidecar, Chuck lines up on the starting grid with arch enemies, Gary Gritter and Brick Jagger, and a whole host of new characters.

ON YOUR MARKS

Spanning twenty-eight courses and with sixteen opponents in the running, Chuck Rally offers one or two-player action. The main bulk of the game is seen from directly behind Chuck's bike, with the Mega-CD's scaling capabilities used to scroll the assorted hazards and backdrops smoothly past the main sprite. However, with their tongue lodged firmly in their cheek, Core has also added an overhead view and a Virtua-style perspective which is still behind the racers but much further away. In the

WACKY RACERS

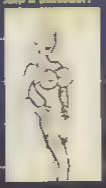
The sixteen opponents have all been sponsored by companies eager to get their hands on Rockafella's lucrative contract, and their respective skills are broken up into four factors: strength, speed, manoeuvrability, and weapon power. Here's a list of those comily-named contenders in full:

Axle Roads and Max Iloed — Crash'n'Burn Cars
Barry Mammothnose and Willy Mammoth — Concorde Car Company
Bob Hardley and Jimi Handrix — Hardley Dibsons
Brick Jagger and Gary Gritter — Dotstone Motors
Granite Jackstone and Teena Bumo — Dinybike Corporation
Rock, Aching, and Sloughtaman — Kylie Kors 'n' Motorsickles
Sabo-Tooth Tiger and Sid Varicose — Cave-Punk Cars
Stiggy Saurus — Bike-O-Saurus Inc
Stomp Blackburn and Wheel Diamondo — Dead-Good Dino-Bikes

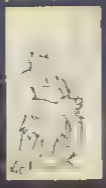
▲ Stiggy Saurus. The fattest member of the team. And a dinosaur.

▲ Sid Variasse. The first of two pictures. I hope you like them.

▲ Jimi Hendrix. Oh look, a stone guitar. Giggle.



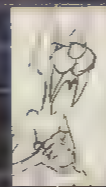
▲ Granite Jackstone. The first of two pics. Oh, old joke..



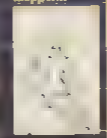
▲ Brick Jagger. About to go dubbing, no doubt. Tee hee.

▲ Axle Roads. Complete with impressive chopper...

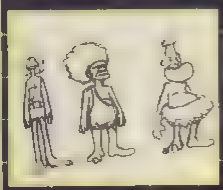
▲ Sid Variasse. Prehistoric punk to the gunky.



▲ Sabo-Tooth Tygar. An overgrown moggy.



▲ Granite Jackstone. Hobby bobbin.

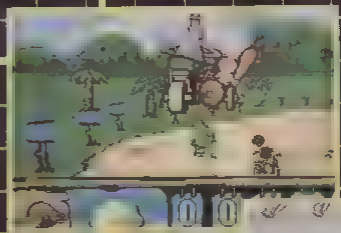


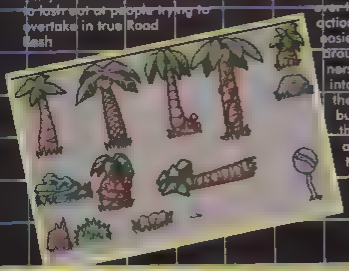
▲ I fancy doing a skid fake there. Oops, no space...

▲ Looming Impasse assessing Diesels.

▲ A side-on view of three of the sprites. Each features a full set of rotational animations.

▼ Check out the old bike there, the second sprite on the right. Nice, eh? And check out that bloke next to him. Looks like Freddie, running up from behind, and about to give him a good swift kick up the arse, I'd say.





game's one-player mode, they are given control over both throttle and brake with the joypad steering and accelerating the bike, whilst the buttons are used to lash out at people trying to overtake in true Road Rash fashion.

If a second player joins in, though, the second controller is used to control Jim whilst the other steers the bike, and allows more control over the little tyke's actions and makes it easier to steer around tight corners by leaning into them. Should the bike hit a bump, though, the characters are thrown from their seats, which means control switches over to the second player!

▲ Jumping for joy as the characters prepare to swap seats. As of yet though, it hasn't been implemented, so use your imagination.

THE ROAD HOME

Rockafella's proposed route takes the racers all across Chuck's home town and into the wilderness beyond. Starting in the jungle, assorted lizard and pools form the main hazards, and these are altered to cater for the different conditions each level contains. As of yet, the rest of the stages have yet to be decided, but the programmers are considering a rock city, a snow blizzard, a trip [illegible] canyon, a cave system, night driving, and a swamp section. Thus, whilst rocks may cause the most problems in the jungle, these are changed to become big snowballs for the blizzard section. Oh, and keep an eye out for Gary Grittner's two henchmen who appear occasionally to lob a tree in Chuck's path.

HERE'S ONE I MADE EARLIER

In charge of Chuck Rolly's graphics is Core newcomer, Toby Gard, and he's responsible for ensuring that the bikes and riders are as varied as possible. Hey, and here's how he does it:

Each character starts life as a wire-frame stretch which Toby can rotate to ensure every possible angle is covered. From here, he then adds the rest of the sight-colour [illegible] using the existing black lines as the outline.

The bikes seen in the game are all the same, so Toby simply cuts and pastes the existing vehicle sprite over the two riders, to save drawing any more of their bodies than is strictly necessary...

... as seen here. With the characters removed from the bike and drawn and coloured, and Toby then selects the bike picture from his hard disk and drags it on to his screen. The bike is then pasted directly under the character sprites to create one main image. This is duly saved as a single sprite. Voilà, instant racer!

SYNDICATE

You can't beat chips can you, eh? Especially if they've been stuffed in your head, enabling you to control others. Yes, it's the spitting image of Mel Gibson and/or Marilyn Monroe Wright ... [illegible] coming out each ear and a battered [illegible] stuffed up her nose for good measure. Lucy Hickman ambled down to Bullfrog to check out the experience that is Syndicate.

Right? Or at least that was true in the Ridley Scott vision of a world sometime in the future. Somewhere where the sun never shone except in a half-hearted sort of way, and where the rain was so acidic that it burnt holes in your mac-new hat, where flowers and birds were a big no-no cos they gave you cancer just by looking at them! In those Blade Runner-esque days three big corporations ran the whole world and the only expression changes on the people's faces was from glum to dead — heavy stuff.

And then some bright spark invented the chip, and there was much rejoicing cos you could stick it in your brain — grease an' all — and give yourself a shiny, rose-coloured view of the world where life is beautiful all the time and they've come to take you away ha ha, hee hee... Of course it wasn't long before these multi-corporations realised the marketing value of these little chunks of silicon for naw, whatever you churned out, the masses would always love it — ultimate control was theirs!

Naturally, as so often happens when somebody happens upon a good thing, you get lots of people trying to cadge a piece of the action resulting in wide-spread chaos, a splitting of the corporations and a veritable fest of violence and blood-letting as all and his mother move into rival territories, kidnap key personnel, destroy major installations, and seize control.

In the game, you assume the role of boss of one of the smaller corporations. When I say small, I'm talking really small, cos you haven't even got a territory yet. But you've got big ambitions and a crack unit of cybernetically-enhanced fighters at your disposal with which to conquer the world.

The aim is to battle around the fifty or so world sectors, completing the various missions on each and shooting the cack out of all and sundry through your remote controlled henchmen. By altering the input from the chips implanted in their brains you can change them from cool, calculating killing-machines into stark raving psychopaths, or somewhere between the two — whichever the mission in question demands. Hold onto your hats ladies and gentlemen, it's going to be a bumpy ride...

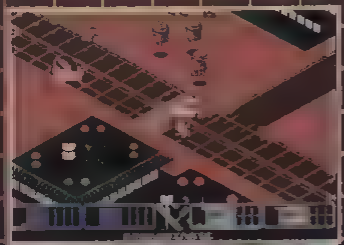
GET YER KIT ON!

You can take up to four henchmen out in the field, but first you have to build them. Each has a basic body but it's possible to cybernetically enhance them by adding on [illegible] (for example, a more intelligent), more powerful arms and legs, a harder chest and even a stronger heart to help them take the pressure. The best way is to make one of them a leader by giving him the best weapons and other extras, as they can then be used as the leader. The other three need only be equipped with one of the special features making each of them ideal for a [illegible]. Our leader, Chief, has a [illegible] weapon which brings the target under your control, and will shoot their own kind if you've got a gun hanging around.

DICATE

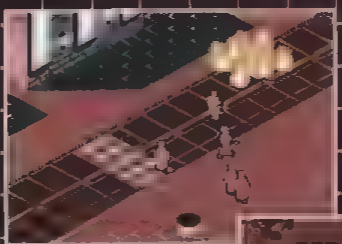


PILGRIM'S PROGRESS

Okay, so you've got your nice little HQ sorted, with all the remote control batteries charged up to max — now it's show time. When you choose a mission a screen flashes up displaying your objectives for that level — this could be anything from kidnapping a top boss (or, more likely than not, wasting him) to blowing up the research centre. Either way, it's going to involve an extraordinary amount of carnage — start wetting your pants now shoot 'em freaks. You can choose to start anywhere on the map and then progress in any direction (as long as the land is adjoining your own conquered territory). However, if you start in certain areas you won't yet have enough fire power to go forth and conquer and it will be curtains for you!

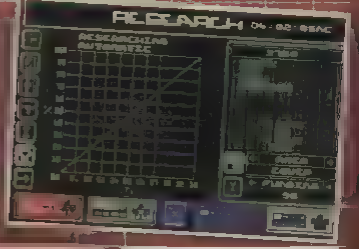
RESEARCH

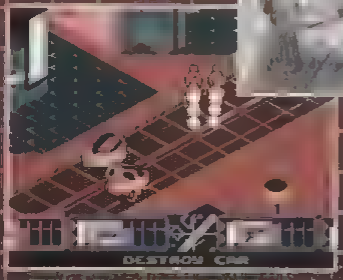
Once you've conquered a territory, you can start collecting taxes from the populace. Pump the money into your research centre where dozens of little scientists are beavering away building bigger and better weapons, armour and body parts. Use the rest of the money to buy these wares but don't put up the taxes too high or the peasants will revolt and you'll have to conquer them all over again.

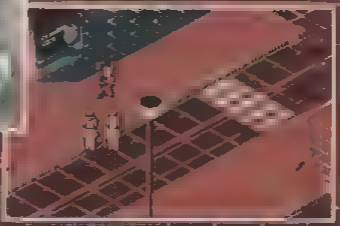


BRAIN BARS

All your squaddies are kitted out with an adjustable bar control ling intelligence, aggression and perception, which can be altered to make them particularly adept at a particular task. Thus, if you want him to guard somewhere set his aggression on high (so he'll shoot everything that moves), his perception on high so he an tell where they're coming from) and his intelligence on fairly low (if you set his intelligence too high he'll do what any sensible person would do — run away!)



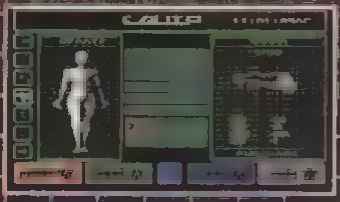




The strange-moustached programmer in the flesh.

DAFT NAMES 'R' US

The programmer of this very fine specimen is the absurdly named ZIKI — not his real name, as you might have guessed, but his initials (he gets a bit touchy if you try to call him anything else). His former offerings on the Megadrive front were the alright Smash TV and the rather awful Gunship — ob well, everyone's allowed one flop ain't they? He's been working on this Megadrive conversion since July and hasn't come up against too many problems — except for trying to squash the much into too small a space — but he's getting round



FROM MINOR TO MAJOR

This is Bullfrog's first Megadrive game. Head honcho, Peter Molyneux who shot to fame around six years ago with the staggeringly successful Populous on the Amiga and then on every other system known to mankind said that although other games such as Powermonger and Populous were later converted onto the Megadrive, they weren't really suited to the system. The solid Syndicate was the first game they actually designed to be better for the consoles than the home computers. Bullfrog are very single-minded about wanting great gameplay and stacks of originality, and they think they've found it with Syndicate. As Peter surmises this would suit lots of types of people: the shoot 'em up fans who just want to blast their way through all and sundry and the strategy freaks who realise that you can get through a lot smoother if you use your bonce. The team has kept the same graphical style as the Amiga and PC for this Megadrive version, but many of the levels have changed and many things, according to Peter, have been improved

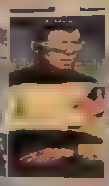
Star Trek
THE NEXT GENERATION

"Space, the final frontier. These are the voyages of the Starship Enterprise, her ongoing mission: to explore strange new worlds, to seek out new life and new civilisations, to boldly go where no man has gone before!". These rather immortal words greeted TV watchers of the mid-Sixties, tuning into a new sci-fi series, unaware they were watching the start of a cosmic entertainment success — a voyage into money-making of galactic proportions.



The voice wasn't that of the familiar Bill Shatner on that first inaugurate pilot. Character Hunter (AKA Capt Christopher Pike) was at the helm of the wobbly Starship Enterprise. The point was fresh on the cardboard sets, the cast had practised their 'we've just sustained a phaser-blast-Cap'n' wobbling routine, and Gene Roddenberry, the show's creator, had just secured a series for the show.

He knew that Star Trek wasn't the only sci-fi series going out on the network. The Sixties space race between the USA and Russia had created a feverish space fad. However, Star Trek took a more ...less silly view of the subject than shows ... Lost in Space'. LIEUTENANT WORF

Worf is the only Klingon ever to have graduated from Starfleet Academy. His traits make him perfect for the role of Enterprise Security Officer. Proud, fierce and loyal, Worf's warlike sentiment is balanced by the code of honour of his race.

THE CHOICE OF THE NEXT GENERATION

The Next Generation has run for six seasons in the US, with a seventh starting its run this year. Each has around 25 episodes, making a staggering total of over 150 episodes. The sci-fi part of Star Trek is subordinate to the drama of the characters. The game uses the personalities of the series to much the same effect. Here are the main crew members on the Enterprise.

CAPT. JEAN-LUC PICARD

He came to the Enterprise after a 22 year exploration mission on the USS Stargazer. Picard is a strong leader who expects respect. Picard has the reputation of being fair-minded, but has certain prejudices.

COMMANDER WILLIAM RIKER

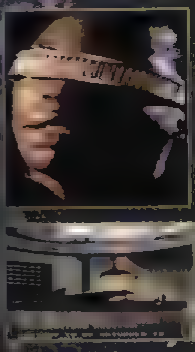
Riker is Picard's direct subordinate. They share a close relationship, as both have the same assertiveness and self-confidence. Riker's role as First Officer is to oversee the vessel's maintenance, and also command away missions on planets.

Damage limitation is just one of your onboard functions.

Glamorous Ship's Officer, Dr Crusher is an intelligent and strong-willed physician in her own right. Dr Crusher and Captain Picard are connected through Beverly's late husband, who died on Picard's previous command.

LIEUTENANT COMMANDER DATA

Data is an android, but one so perfectly made, he tested as 'alive' when applying for a Starfleet commission. Data is inherently loyal to the Starfleet code, but often displays the child-like naivete of artificial intelligence with his questions. He's certainly the most endearing and complex character on the Enterprise.



THE GAME

In this Megadrive game you join the Enterprise on patrol duty. Routine patrol is soon broken by messages received over the sub-space frequencies and by directives from Starfleet command. The game spreads itself across the many areas of a mission — with space battles, negotiation, and planet expeditions.

ENTERPRISING SPIRIT

Your Starfleet vessel under your command is the USS Enterprise, a Galaxy class Starfleet craft. This is the fifth ship to bear the name since Capt. James T. Kirk piloted the Constitution class ship in the late 23rd century. The Enterprise is 641m long, has a crew complement of 1012.

PROPULSION

The Enterprise has two separate propulsion systems for interstellar and local space travel. Impulse power is used for travel below the speed of light. Warp power is for attaining speeds beyond the speed of light. The increments of warp speed are between one and ten. Warp Factor One is light speed, Factor Ten is a theoretical infinite speed. Higher warps drain energy, and risk structural damage. (Junsdiction: La Forge)

TACTICAL

The ship is fitted with all round deflector shields, activated from panels mounted to the ship's exterior. These take energy priority during tacticals. The Navigational Deflector sweeps away obstacles in front of the Enterprise during warp speed. (Junsdiction: Riker)

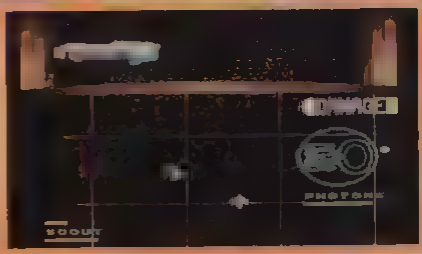
WEAPONS
The Enterprise has two weapons systems. Phasers use special phased light impulses of incredible intensity. At full strength, Phasers can destroy a small moon. Proton Torpedoes are computer targeted 'bombs' containing a small piece of anti-matter. (Jurisdiction Worf)

Transporter Control
The ship's computer is programmed with all the member planets of the Starfleet Federation. Transport from orbit is made by particle transporter. This device uses two sensor panels, above and below the transport subject which reads their molecular and sub-atomic structure and converts them to an energy pulse. This is directed to a fixed point and then unscrambled into a matter trace. (Jurisdiction Data)



THE PRIME DIRECTIVE

Star Trek TNG should not be approached as just a space battle game, as this violates the Prime Directive. This is the first rule of Starfleet Command — that officers must not intervene or interfere with the flow of life unless it threatens them directly. Hanging around the galaxy shooting down Klingons comes into this category. Therefore, it's always better to communicate first.

▲ Riker rocked by robotic phaser.

In the 24th century the Legion of Shamen fans is a deadly force.

THE AWAY TEAM

A large part of your mission involves 'beaming down' to the planet surfaces. Using the transporter, you take up to four members to explore distress signals, deliver goods or make contact. On the planets you visit, there is often a specific goal to be achieved before you may leave. Planets are viewed as overhead mazes.

THE UNDISCOVERED COUNTRY

By the 24th century (the time of TNG) 19% of the Galaxy has been charted. Even this represents a mind boggling range of stars, many merely marked on star maps and still unexplored. The TNG game covers the small part of this area known as Federation Space. Most of the planets in the systems are uninhabitable and cannot be visited. So it's a good idea to follow directions instead of cruising around looking for somewhere to beam down.

Dear Yob

I have a slight problem. When playing FIFA Soccer with Scotland against England, when Scotland were winning 2-0, the game blanked out and a screen appeared saying 'Sega library internal error illegal instruction

I am here today to talk to you about Sod's Law. It is a famous book which tells of how, if something could possibly go wrong, it will. It affects the trains when you need to get somewhere on time, and it causes spots to appear on your nose if you've got a hot date. It also means that if you do something wrong and think you've got away with it, a strange fluke of fate will rumble you. It's also Sod's Law that, when I want to write something funny here, my brain falls me completely. Ah well, if you want to converse with Yob, please feel free. COLUMBO

Dear [illegible]

I used to find that, when I wanted to know a percentage of a game, instead of rummaging around in my old back issues of Mean Machines, it was handy just to grab any issue and look up the game in the Index. I have one simple question: where the hell did it go?

I would recommend you bring it back as this would be the icing on the cake of your near perfect magazine

Matty Wheyard, Nottinghamshire

YOB: The reason the Index went is because it was taking up more and more space. We may reintroduce it occasionally, but it certainly won't be appearing every issue. After all, why fill six or more pages with old games, when there

YOB:Basically, it means that your Megadrive hates you so much that it intends to spoil your games whenever it gets the chance. The error message is in fact a binary translation of 'cop that, you git.' Then again, perhaps it was just a one-off problem and one that isn't exactly rare – certainly not worth contacting Arthur C. Clark for, anyway.

IRONSIDE

Dear Yob,
I think you were very unfair on Sensible Soccer. It was reviewed in the same issue as FIFA and, as such, was put down a lot. After Christmas I went out to buy a copy of FIFA but it had sold out so I went into Boots and bought Sensible Soccer instead. Ever since I haven't been able to get off my Megadrive. I think it's a great game and deserved a better rating that it got. Ok, so FIFA is better but I reckon that the only reason you scored Sensible Soccer was because they came out at the same time.
Carl Evans, Shrewsbury
YOB: Doh! Sensi was awarded 85% which is hardly a low score, you dimbo! Basically, just as every new beat 'em up is compared to Street Fighter II, FIFA acts as the benchmark for all new footy games. It was always going to be compared and I'd rather spend my forty-odd quid on a game which is both playable and pushes the Megadrive's limits than one which is playable but is a barely-enhanced Amiga game. If I was Alex Ferguson, I wouldn't just buy another player because Ryan Giggs was off with flu.

Dear Yob,
We are two really fed up Megadrive owners of Street Fighter II. We have tried it on difficulty level 7 but couldn't get a punch in at all. Then we tried it on the first difficulty level but found it just as impossible. We realise we are sad games players but this is just one of many games which baffle us. Others include Sonic and Dark Castle. We also bought a copy of Alien Storm for the Master System but found it doesn't work on our Megadrive. One more request: please send us a copy of Terminator + Judgment Day as it looks really brill.

Dear Yobber
A friend of mine reckons Sensible Soccer on the Super NES is better than the Megadrive and Amiga [illegible]. Is this bloke right or [illegible]? I reckon the Amiga ver[illegible] is better than both and that Street Fighter Turbo on the Super NES is better than Special Championship Edition for the Megadrive. Please, please, please print this.

YOB: First of all, stop telling porkies – everybody knows you haven't got any friends. It's written on every garage door in London. The Amiga version (especially the V1.1 version) is identical to both in virtually every respect. As for Turbo on the Super NES, the only the thing the Sega game lacks is decent sound. Besides, if your mate's Super NES is so good, why can't he play FIFA on it?

[illegible]

Dearest, meanest Yob,
How are you feeling today? I am fine. Here is a brief note to tell you about my brandest, newest game invention. It is called Street Fighter II Slow Motion. Snail Fighting. The title basically tells you what it's about: a slow-motion beat 'em up. Like the sound of that? It plays almost the same as Hyper Fighting, but goes the opposite way in that it's a lot slower and crap. Once you start playing you won't be able to put the joypad down. And I mean you literally won't have that particular capability. For the simple reason that the game cannot finish because if a character like M Bison threw a punch at another player, say Ryu, it would be such a slow punch that Ryu would have enough time to jump over the attack every time. This could happen with any of the characters. Boring or what? Crap or what? Avoid this game if you are an action-loving Megadriver.
Mr Crap Games Inventor, Stockton on Tees
YOB: Sorry old bean, but you've been beaten to it. Kaneko did the same sort of thing several months ago with a piece of smelly drippings called Deadly Moves. What's more, they also captured the dull end of the platform market with the equally squalid Chester Cheetah: Too Cool To Fool. Never mind, if you hurry, you'll be able to come up with an arcade/adventure even slower than Dark Castle. Then again...

JESSICA FLETCHER

Dear Yob
I have a complaint to make. When I went to the States I was going to buy Bulls Vs Lakers which was cheaper than Bulls Vs Blazers. In the end, I bought Bulls Vs Blazers only to find out they were the same game. I also saw a cheat for Lakers in your magazine and tried it out with my copy of Blazers and it worked! Are they the same game?
Simon Potts, Staines
YOB: To all intents and purposes, yes. EA have a game engine for the likes of Madden and Hockey which they tweak and add new features to if they feel they can add something really worthwhile to the game. The same thing happens with Lakers/Blazers. The main differences lie in the statistics and little speed additions, but, yes, the basic source code is the same. Remember Confucius he say: Always Read Mean Machines Before Buying A Game. But not any more because he's dead and would probably whiff a bit now if you were to go and ask him a question.

DAGGER

Dear Yob,
In the four years that Sega have been making Megadrive games I feel the price of games has gone up too much. For instance, when they started making 16-Bit games, the average price to pay was £30-35. Now it's anything between £45-60. Sonic Spinball, for example, is a few levels of bad colours on detection and cannot justify its fifty quid price tag. Mind you, the only alternative is to add an extra sixty quid and buy a Super NES so you can be ripped off by Nintendo too. Don't worry, though, as in two years' time Konami will finally release Elite II for the Megadrive for a measly £80. Why so much, you ask. Because it has got a chip in it and it costs a lot to

make. Hmmm that's bul It's because supposedly reputable magazines like you won't persuade us consumers not to buy them In fact, you just want us to pay extort onate prices and make our Ma and Pa s poor just to see good graphics and see Sonic in another blatant cash- n (ie. Spinball) And you probably don't winge to the big companies like Nintendo and Sega about how they're making children go out and steal so they can get the chance to score a goal in FIFA Soccer

It's about time the public got smart. If nobody bought any games, Nintendo and Sega would still be making a hideously big profit Many a time I have ignored the mickey-taking from Amiga owners who get their games for as little as £15 less than half the price of a Megadrive game, and with the advantages of being able to save to disk, etc

Mike, Margate

YOB: Whilst I agree that games are indeed overpriced, I think that saying Nintendo and Sega are forcing kids to go out and steal for them is a bit over the top! I mean, they're hardly major-league Fagins out to pick the pockets of the gentry! Yes, games are too dear, but Sega's argument that it does cost more to use extra chips is a valid(ish) point. Maybe not to the extent of sixty-odd quid, but you'll still have to pay more if you want Virtua Racing's polygons to be as close to those of the coin-op as possible. Both Nintendo and Sega are currently being investigated by the Monopolies Commission (who aren't allowed to pass 'Go' or collect £200) who will decide whether games are currently too dear. If both Sega and Nintendo can't come up with a justifiable argument for their pricing, then we can expect to see a reduction in price later in the year – along with the heads of the companies sat in stocks so the games-buying public can lob fruit at them Until then, nobody's forcing you to buy games...

▲ *I honestly didn't know NMS's Tim Boone was in Streets Of Rage II, Christian Ward.*

▲ *Dunno who did this one. Batman and Sonic in a nightmare scenerion. Discuss.*

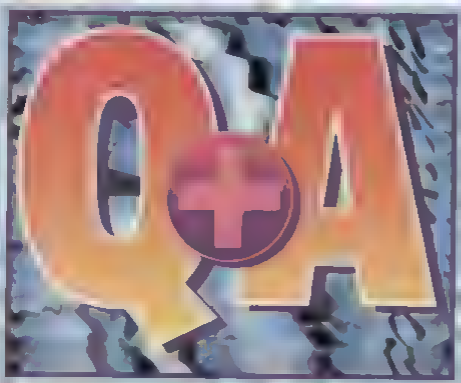
FATHER DO[illegible]

Dear Yob,

A few days ago I bought Mortal Kombat on the Amiga 500 and I think it is a better version than the Megadrive version (which I used to own). It has more speech more gore and better sound effects, and it only comes on two disks. I also own SF2 for the Megadrive and this massacres any version of Mortal The point I'm trying to make is that the Amiga is not sad, and can come out with some good games - Stardust has an outstanding Mode 7 effect for example Before I go I have one last question s the Saturn still going to be a 32-Bit mach ne when Atar s Jaguar will be 64-Bit and Nintendo's Hyper NES will be the same

Asad Ali, Leicester

YOB: You fur-brained chimp! I don't actually recall slagging the Amiga off! Additionally, I have never been a fan of Mortal Kombat in any of its forms, as I think it was a half-baked piece of tripe which was only popular because of the brilliant hype surrounding it. Basically, it's just a second-rate beat 'em up which isn't half as instructive as Street Fighter and which tries to use gore to redeem its lack of playability and originality. Actually crap is the word I'm looking for. As for the Saturn, yes it's going to be 32-Bit, CD-based machine — but don't write it off yet. The Jaguar's software support is slow to say the least, and the as-yet-unnamed Nintendo machine only exists in Mario's sticky-pant dreams. If it happens in the next year or so, I'll roast my knackers over a candle.



STEVE'S Q&A

Oh, the misery of it! Locked in a dusty room and smelling like a conga in an old peoples' home, Steve Merrett has only the monthly deluge of question-filled letters to look forward to. Yes, whilst normal people are out enjoying life and walking dogs and things, Steve and his oversized brain prepare for more Super Street Fighter and Mortal Kombat 2 questions. As Englebert Humperdink (ask yer Mum) once sang, 'Please release me...'

However, whilst he's still in there, why not take advantage of his inprisonment to pick his planet-sized brain, zombie-style. Just drop him a line at OF COURSE I HAVEN'T FARTED, I ALWAYS SMELL LIKE THIS Q&A, MEAN MACHINES SEGA, Priory Court, 30-32 Farringdon Lane, London, EC1R 3AU

TUKKA BOOTS

Dear Steve
Please answer these questions for me
1 Which Star Trek game will be appearing on the Megadrive?
2 When will it come out?
3. What do you think is the best game available for the Megadrive?
4 Will Star Wars be coming out on the Megadrive?
5. Apart from Kick Off, are there any football games planned for release on the Game Gear?
6. What is the best game on the Game Gear?
Stephen Kirk, Bothwell, Glasgow
STEVE:1 and 2. There's a Next Generation game on its way from Spectrum Holobyte and it's looking very smart indeed — and an enhanced CD version is also on the cards. Also, a Deep Space nine game is also on the cards, but has yet to be picked up by a UK distributor. Neither have firm release dates as of yet. 3. At the moment it's FIFA, but it changes virtually every other month. 4. Yes, sometime in April. 5. Sensible Soccer is on its way and is excellent, and Tengen's World Cup Soccer is already out. 6. Sonic still reigns supreme, followed by Defenders Of Oasis.

BRACES

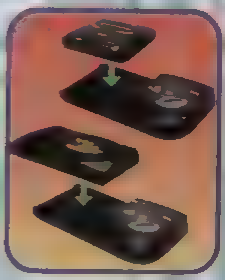
Dear Steve
Here are some questions for you
1 When the C nepak comes out will it allow the Mega-CD to produce 'clean' Full Motion Video, like a laser-disc?
2 Is Virtua Racing on the Megadrive better than F1?
3 Here in Sweden we don't get a six-button joypad when we buy a Megadrive II. Why?
4 Is Silpheed any good?
5 Why do you keep telling readers they can't subscribe? I subscribe!
6 Are Double Switch, Prize Fighter and Ground Zero Texas any good?
Joakim Hammarström, Hägersten, Sweden
STEVE:1. It'll allow clearer pictures, but not TV quality 2. Is a Ferrari better than a Skoda? 3. Dunno — perhaps the UK won't let you have them because you gave us Abba. 4. It's a playable blast, but basically it's Galaxians with knobs on. 5. Do we? Well, slap our wrists 6. Yes, no — complete crap, and limited.

TANKTOPS

Dear Steve
Please could you answer the following questions
1 When will the following Sonic titles be released — Sonic 3, Sonic 4, Sonic CD 2 and Sonic Spinball 2?
2 In Sonic Spinball 2, is it true you can choose one of three players — Sonic, Tails or Knuckles from Sonic CD?
3 When will PGA Tour arrive for the Mega CD?
4 Is it true that Super Street Fighter 2 will be released on Megadrive and Mega-CD at the same time?
5 When is Streets of Rage III out? How much will it cost?
6 When will the RAM for the Mega-CD come out, and how much will it cost?
7 Will the RAM allow us to copy CD games?
8. Will Sega bring out a machine which fits under the Mega CD to make it a 32-bit or 64-bit machine?
9 Is Sega planning a replacement for the Game Gear?
Thanks Jaz.
Anon
STEVE:1. Bloody hell! We've only just got Sonic 3 and already we're getting questions about a fourth game! Give Sega a chance! As for the others — there's no news, because I expect the programmers are still shagged out 2. No, because you've just made it up. 3. As soon as the bus turns up — ie. there are no plans for a conversion. 4. I take it you're Doris Stokes or some other medium. Bearing in mind Capcom haven't set a release date yet, what makes you think they've decided on a simultaneous release? 5. Sometime in March, the price hasn't been decided yet. 6.

PEDAL-PUSHERS

Dear Steve
Print these questions or I will make you play Ghostbusters
1 Is Eternal Champions any good? (If not, thank God)
2. Why do people play Sensible Soccer, and who let them out the asylum?
3 Will Mortal Kombat 2 be coming out on the CD or Megadrive?
4 Is James Pond 3 crap?
5 Why are you a twat?
Soho
STEVE:1. Yup. 2. Because they haven't got FIFA probably. 3. Both. 4. No, but it's nothing special. 5. Because I want to be — what's your excuse?



Official Mega-CDs already have it included. Only unofficial machines are without, and you're importer should be able to help you out. 7. Nope, it's only for saving game positions. 8. Nope, but the Saturn will be a 32-bit CD-based machine. 9. There's rumours of a 16-bit handheld, but nothing definite.

JEANS WITH PIPING DOWN THE SIDE

Dear Steve
Hi my name s Stephen, a so known to my close friends as a big pile of crap Anyway straight to the po nt I have some questions that will test your answer ng trouser powers to the fullest
1 The other day I was at the airport when I found this badboy (in English this means "very good") arcade game called Prem er Soccer. Will it ever be released on the Megadrive?

5 Why isn t Jaz the Editor anymore?
6 My fr end asks if Syndicate is going to be released on the Megadrive?
7 And finally will J League Soccer ever be released here?
Stephen Hughes Earlsfield
STEVE:1. No news yet 2. No, it's a conversion of the rather smart NES version. 3 Oh, yes. 4. Yep. 5. He's gone to seek fame and fortune in the US of A. 6. It certainly is — courtesy of EA. 7 Probably not

1 When will NBA Jam come out on Megadrive? Will it have the speech of the arcade version?
2 What s the best game you have ever reviewed?
3 Is Ground Zero Texas good n the arcade and wi it be the same on the Mega CD?
Your mag is the best
Phillip Selby, East London

1 Which is the best beat 'em up (besides SFII)?
2 Is Zool any good?
3 Is Chuck 2 Son of Chuck any good?
4 What is the difference between the Megadrive 1 and 2?
Thank you for all your time
Tom Battigieg, Warwickshire
STEVE:1. Eternal Champions! 2. Nope. 3. Yeah, but a bit limited. 4. The Megadrive 2 is a smaller machine and has lost the volume button and headphone port.

LACOSTE GEAR

Dear Steve
I've got a few questions for you, would you please answer them?
1 With Saturn and 3DO on the way, do you think the Megadrive is on its way out?

5. Nice question — what's your shoe size?
Sorry for all the room taken, but please print the letter
Jesse Van Kaller-Rout, Rulphen, Holland
STEVE:1. Not for a while. 2. Very impressive, but it could do with a dust. 3. Ten feet along the office. 4. Landstalker 5. Big tens.

TONIC TROUSERS

Dear Steve
Our television has gone a bit funny because it has got a green fringe around the screen Is the television going, or s my Megadrive going? p ay a lot of video games on t and the co our seems to flicker I was told video games can break down tel vsions Is a monitor okay to use on a Megadrive? How much is a monitor? Where can I get one?
Steve Theobald Cheshunt, Herts
STEVE:It sounds like your telly's on the way out, but your console can't be blamed for that Monitors offer a much clearer picture, and are available all over the place for roughly £200.

MOON BOOTS

Dear Steve
I am writ ng to you to ask questions
Is there going to be a Cool Spot 2?

1. I have Toejam and Earl. Do you think I should sell it and get Toejam and Earl 2?
2 I have SF II. Do you think it's worth getting SSF II next year?
3 I've heard of the Wondermega in Japan. Will it ever come out in the UK?
4. When is Road Rash III Roller Rash coming out?
5. Is the Sega Saturn 32-bit or 64 bit?
Alan Harriner, Dorchester
STEVE:1. Yes. 2. Yes. 3. No. 4. It's called Skitchin and is out in March. 5. 32-bit.

HARRINGTONS

Dear Steve
Answer these questions for me
1 In Issue 16 you reviewed Eternal Champ ons. How come their names are like those of The Gladiators? Eg Shadow = Shadow Trident = Trojan, Lorcen Tyler = Saracen, Jetta Max = Jet
2 In WWF on the Mega-CD, when you accomplish a finishing move, does the Mega-CD play the video graphics of that move?
3 If No 1 is right, can I have Royal Rumble on the Megadrive?
Anthony Smith London
STEVE:1. How do you get Trojan from Trident! I mean if there was an eternal champion called Wilf would you think he was related to Wolf? Oh yeah, and all the Street Fighters are named after pop stars. Vega = Suzanne Vega, and Chun-Li = Peters and Li. Or something 2. Nope. 3. No.

With a huge effort Steve found he could move his legs. Falteringly he headed for the door and inched towards the only thing between him and clean trousers Just the steps to go and he was free Will he get out? Will he manage to avoid the comedy rollerskate left in his path? Tune in next month for the next thrilling instalment of Q&A with Steve Merrett

PAUL'S TIPS

SPRING

It's Springtime, the time of year when strange things can, and often do, happen. People generally become more productive in this celebrated season. Not least the dribbling, red-eyed, caffeine-driven monsters that inhabit the small tips section each month. Yes, you can always tell it's Spring because Steve walks around with his hands in his pockets and Lucy sucks her thumb, Gus makes lots of strange phone calls and Oz says 'Booyaah!' more often than usual – no mean feat in itself.

Well I suppose you know what's coming next... keep producing those tips and send them in, you muckers! No half hearted efforts please, and only first-hand genuine articles accepted. No used items, please – it is Spring after all. Send all entries to:

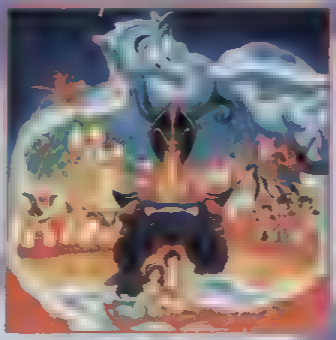
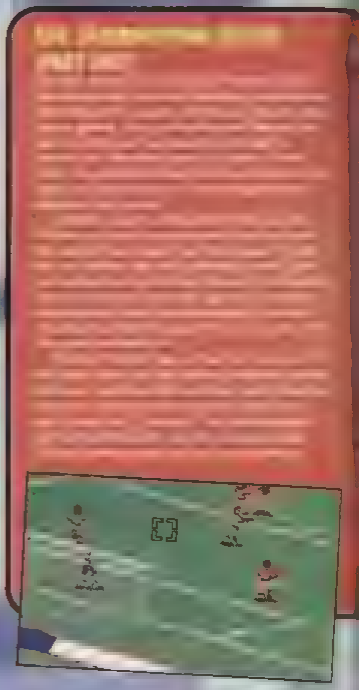
Aladdin

As everyone is surely aware by now, Sega's Aladdin is quite superb. It's so wonderful in fact that the Japanese Multimedia Software Promotional Committee has voted the game as being the best of 1993! This is a good excuse to print Mr M D Parkes' extra continues and extra games cheat. MD advises you to guide Aladdin through the desert stage without touching any of the blue marker pots, collecting all nine gems in the process – and all the genie faces, too. At the end of the level kill Aladdin by falling on to the spikes, whereupon he restarts the level but retains the gems he collected. With these he can purchase extra lives and continues from the street merchant. There's also an extra life located to Aladdin's left at the beginning of the level.





the HUMANS

Mat and Hardy Miller make their return to the section with this final level code for Gametek's Humans:
Stage 80: XPMNWJKFNQ2C

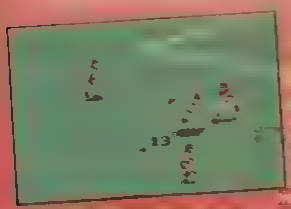
[illegible] VS BIRD

Another Miller Bros effort is this, in their own words pretty pointless exercise for a Basketball game. During the one-player mode pause the game when the timer hits 00 00 at the end of the fourth period. Call a time out and, if successful, the timer now provides a further 36 minutes of play. Repeat this when the timer runs out again for a further 100 minutes!

[illegible] PARK

Ho hum. Another Miller production ventures onto the page. When Dr Grant throws his toes for the last time select the password screen immediately and choose the START [illegible] Grant from [illegible] continues [illegible] where he left off

FIFA INTERNATIONAL SOCCER



Those Miller boys are back again! Before Jaz toddled off to the States King Salmon was one of his favourite games — although he probably wouldn't admit it! He won't be the only person to appreciate these fishy level codes though.

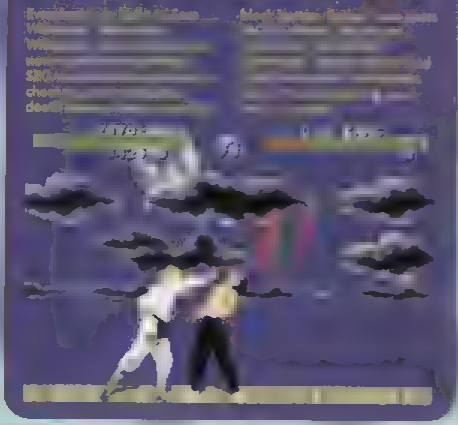
MORTAL KOMBAT



Puggy

Yes Ed 'congratulations' for having your passcode printed. No doubt you're over the moon. Pity about those embarrassing stickers though, eh!

Ed Lomas's Passcode for Puggsy:
040 753 100
654 736 561
633 117 114

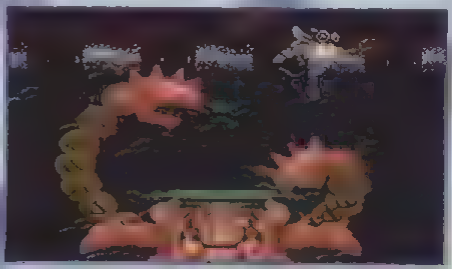
By the way, the code rewards Puggsy with all five guardians defeated and most of the game's levels open for exploration. Blimey, you just can't beat Ed Lomas for his good wholesome tips, can you?

ROBOCOP VS TERMINATOR

Sissy envelope aside, Iain Baxter's letter telling of a secret level in Robocop Vs Terminator is worth a mention. Stage four, the Toxic Farm, is littered with tubs of toxic waste. After leading Officer Murphy across three of them, climb down to a giant tub on the level below. Should Murphy jump into the side of this tub he is transported to a secret level where many a power-up awaits his attention. The only drawback is that these goodies are protected by Terminators!

ROBOCOP KNIGHT ADVENTURES

Having seen this cheat in a number of Japanese magazines, I have Mat and Herdy Miller to thank for providing the translation. Play the game for a while and pause the action. Press UP seven times, DOWN once, LEFT three times and RIGHT once. The word PAUSE is now spelt backwards in reverse, indicating the cheat has worked. Now reset the game and notice that the demo is a replay of your previous efforts!



SPLATTERHOUSE 3

Despite its miserable weaknesses there's something addictive about Splatterhouse III. Should you fall into the aforementioned unfortunate category of persons that hates it enough to give up, you can use these passwords to skip to the later stages:

Stage II: REISOR
Stage III: ETLBUD
Stage IV: TEKROH
Stage V: ELPOEB
Stage VI: LIUTH
Stage X: GOFMTS

STREET FIGHTER II

STREET FIGHTER II

Believe it or not, and I'm not sure I do, Jason Barry from Ireland has managed to emulate all those six-button Street Fighter II cheats with his standard three-button pad! Here's how he did it:

Disable normal attacks At the Capcom logo press DOWN, UP, A, A, B, B, C on controller one [illegible] As the building starts to fade during the intro sequence, quickly press DOWN, C, UP, A, A, B, C [illegible] Press DOWN, C, UP, A, A, B, B, C on controller two when on the Elimination Match Play screen.

Jason is the second person this month found trying to blag a six button joypad off me. Look, I haven't got any! Leave me alone!

SPIDERMAN VS THE KINGPIN

There's just no justice in the world is there! Poor Mat and Hardy Miller have almost written the Small Tips section between them. To further take advantage of their Herculean efforts, we present their Marvellous Mega CD codes.

Did you know the mad axe-men in Zombies are replacements for chain-saw wielding maniacs found in the American version of the game? Well, apparently the rest of Europe weren't too happy with the saws and asked Konami to think of an alternative. Did you know that, Messrs Miller? Bet you didn't.

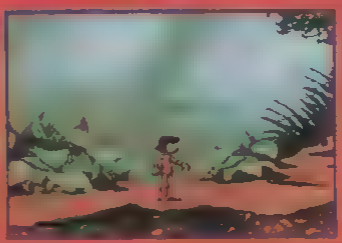
MASTER SYSTEM

Look, I must apologise for the sad state of the Master System tips this month, but nobody has sent anything decent in! Until then, Robert Appleby's pitiful Bomber Raid level select is the standard we can expect. Take it away Bob. On the title screen push UP, LEFT and buttons 1 and 2 together on control pad two. Press button 1 on controller 1 twice and the level select option is shown.

An anonymous bod from Shipley has sent in this useful little tipette. For infinite stars and fireballs, wait until the Ninja has amassed 999 combat points before using any ninja stars. YES — it's an old tip. YES — you are probably better off without reading it. But who's fault is it? Not mine.

Entering the passcode JJIAAHFM provides your player with full speed, power and skill. Should this be a great big lie you have Jonathan Davies to blame, who wrote this letter whilst travelling in a car to visit his granny.

GAME GEAR



Most Megadrive owners don't realise quite what pain is until they delve into the deep ecstasies of Landstalker: pain is pleasure and vice versa. By now our brave adventuring readers have grappled with Goblins, meddled with Mir, and been completely duped by the Duke of Mercator. But now things start to get serious...

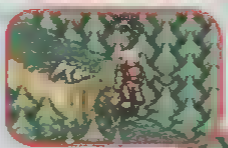
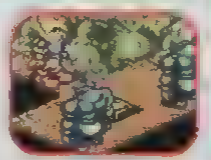
PART 7

THE GREENMAZE

The Greenmaze is entered from the right-hand side of the castle. It's a treacherous set of screens and no mistake. First head East, looking for the hidden path that takes you to Gol, the keeper of the Greenmaze. He offers the useful advice that the bottoms, not the tops of trees should be watched for gaps that mark secret passages.



The first thing to be done is to find Einstein. He's lying in a poorly state out to the west. Get to the cave on the screen with Gol which will take you to the dog. Revive the dog, then follow him to his woodcutter master. He comes in useful later. Now work your way around the maze, trying all the caves until you find one with a small pool and several transporter exits. Jump on the switch to move the statue. Now take the transporter to the large waterfall. Above this is a field with four Orcs AND a secret passage to the rest of the Greenmaze. After much jumping and climbing you come to three strangely coloured trees, which only cutter can remove. After collecting the Sunstone, use the tree warp (explained in last month's guide) to return to Gol's Screen. From thence out of the Greenmaze



DING — A — LING! THE SHIP

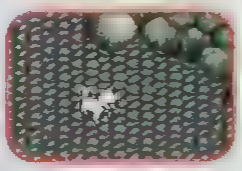
PART 8

A DOG'S LIFE

This mission presents a challenging, but rewarding diversion. After getting Einstein's whistle, you are able to talk to all the dogs on the island. One of them in Massan has an interesting tale to relate. Separated from her lover by the evil witch Helga, she appeals to you for help.



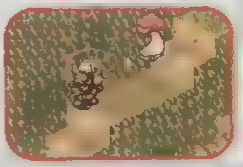
Travel to the witch's hut (revealed last month) and confront her. She turns you into a dog and flees to her dungeon. In your new guise you have the same jumping ability but cannot collect items. On the other hand, though, you are invincible. To reach her you have to figure out four tricky rooms that demand instant reflexes. On the trickiest one with the fast-moving balls, do the following:

1. Bunch the twin sets of balls so they roll together.
2. Go to the top-left switch.
3. When the ball reaches the switch, run with it to the bottom corner.
4. On the sides with two balls, run on to the first ball and jump as you reach the switch.

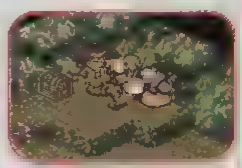
The other rooms merely require practice. After killing the witch, travel up the central wooden lifts to reach the Saturn Stone, a gem that makes your sword power-up more quickly.

PART 9

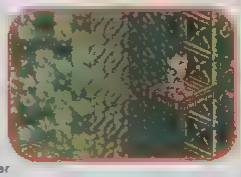
VERLA



Duke Mercator has abducted all the villagers from Verla town and taken them west to the mine. Record the game in Verla, and don't go to the mine without a full complement of Eke Eke, as this bit is tricky. The aim is to find three groups of villagers. The first is found by heading left when you first descend the steps. They will give you a key to the large wooden door in the room with lots of orcs. Pick the two Eke Eke in the small room on the way back.



To get to the second group, reach the room with orcs and vases. After killing the orcs, use the vases to construct a stairway in the top right corner of the room. The second group are found nearby in a room to the north.



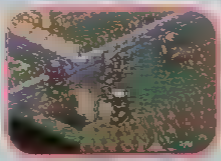
The final group are reached by opening the padlocked door. Behind that lies a lift shaft. Before you descend, jump to the edge on the bottom-left corner. In a room beyond lies an important switch — and two much-needed Eke Eke! Also in this dungeon is a chrome breastplate, which increases your armour power.

In the room with the three large spike balls and two smaller ones, go down the hole, not the passage to the left. Hit the red switch in the room with many spikes, then kill all the lizards in the previous room to reveal a box — letting you climb back up to the previous room, now furnished with an extra door.

PART 10

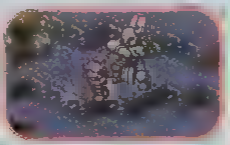
DESTEL DUNGEONS

After freeing the villagers return to Destel. They will tell you that the Thunder Blade sword is in the well. Retrieve it and head back to the mine (the underground passage to Mercator is now clear). Go to the room near the mine entrance which has a passage blocked with two blue statues. These have now moved away. Follow the passage to Destel.



In Destel, talk to everyone and head north. Eventually you come across Mercator's rafts. Head east along the shore and climb the large hill to spot them escape (there's also a life stock and Dahl here). Now head back to the dungeons in Destel.

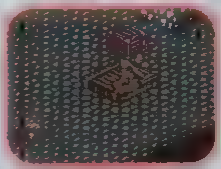
These are darned tricky dungeons, but persevere. Don't bother heading down. In the long hall of travelling lifts, go into the room with four holes and three boxes. Slip a box into each hole, and jump in one yourself (they do fit!). Head up to the screen with a switch and no object to put on it. You have to use the monster's weight to activate the lift. This one requires practice. Also, don't use the Statue of Gaia you find here, as you'll need it soon.



At the deepest point in the cavern, you face a massive hammer-wielding statue. This is vexatious stuff, since every time he wields the hammer you are stunned motionless. The secret is to keep jumping and keep moving. Only attack him when you have a fully-charged sword. His death releases the amazing healing boots. With these equipped, walking gradually heals Nigel, a useful technique when energy is low. Leave the dungeon by the ropes.

PART 11

THE SHRINE



Duke Mercator is pretty smug now. He has a head start and these dungeons are time-consuming and treacherous. Your first action should be to head for the left wing. Head north until you go down. Explore this area for a key. Return to the corridor at the entrance to the shrine. Go south-east and then south-west. These statues are invincible. Just avoid them and a switch will appear.

Go down to the lower-level. Find the golden statue and fall down the hole in the same room. Store up the Eke Eke you find here, as there's precious little elsewhere. In the room to the north-west you must use the vase to step up and hit the statue in the right-hand corner. Then go up. Upstairs is a puzzling room: you don't need the box, and the wooden platforms won't fall, so there's no need to hurry north-east.

The next puzzling place is a room with a boulder and portcullis. Stand next to the door and toss the boulder at the central point of the room. As it lands, dodge north-west. Go up, and open the gate by rearranging the jars. The next room is seriously trap-laden — jump on the bottom switch and fall down the middle. Where you land, placing the boulder on the statues' heads opens the gates. Do the right one first, and activate the switch in the room. Now do the

FINDING KAZALT

After getting the axe-magic, use it to cut the trees at the entrance to the mountainous area. There follows a short section of rooms with some tricky passages hidden behind scenery. Aim north-west, with the aim of getting on top of the large viaduct. Zak, your old adversary, challenges you. Go north and west to reach the challenge place. When he's defeated, take the Gola's eye, jump off the viaduct and use it at the Goddess statue. Also,

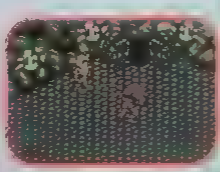
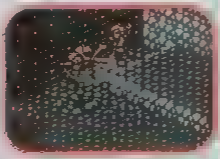
left. You're doing fine when you see the Duke

Head south in search of a room with monsters resembling chests. There's an important key here. Go south and up. Open the portcullis by jumping round and pushing the block on the statue's head. In the next room, one of the switches triggers the rest. Now look for the sword of ice nearby. When powered, it fires a blast. This is used in a later room, where the target statue is across a gap. Head north looking for a door. The route here goes north and west, but there's an armour plate to collect too.



Head up. There's a room with mid-air slabs. Once you activate the switch at the top of the room, one appears in the centre of the slabs. Take the other exit. You are now in a confusing complex of rooms. Most rooms may only be left after killing all foes (see box). In the room with the suspended slab, you must kill all the foes and quickly fall down the gap.



You come to another room with invincible orange statues. No switches here, but guide them into the hole and fall down the right-hand corner. You land on a loose tile, so quickly jump north-east. Hang around until a switch appears. Nip south-west back again and south-east. Jump across that loose tile to the south-west. From here finding the Duke is easy. After you defeat him you are ambushed, but Mir will save you and give you the Axe Magic. From leaving his tower, you can cut through any blue-green trees. Head for Mercator and then the mountainous area, via the Greenmaze entrance.

DUNGEON WARFARE

Later on, you really have to [illegible] crowded dungeons. Use these as guidelines:

1. For single foes, [illegible] swinging is effective. [illegible] lunge.

2. For crowds, it's best to [illegible] small bursts. Go round the walls in a [illegible] group. This is the [illegible] tigres.

3. Avoid [illegible] when restricted.

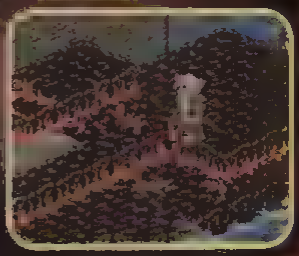
4. Don't use jumping attacks.

5. Don't fight [illegible] to be knocked back into the previous room.

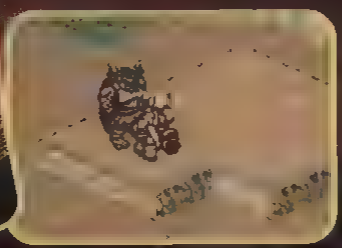
6. In later dungeons many foes are invincible. Just avoid them.

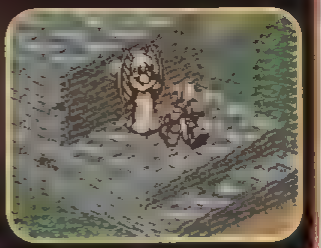
DING — A — LING! THE LAVA SHRINE

After leaving Destel dungeons, head north until you come to a hot cavern of lava. Follow the directions of the riddle by using a Statue of Gaia on the plinth of the Goddess. Then go south and cross the simmering crust on to the Shrine.



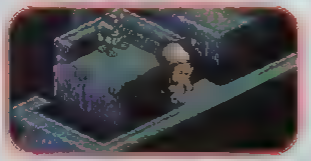
Stone. Get it by walking around the left-hand side. From the statue, you teleport to the caves at the very start of your adventure, but this time go through the door on the left-hand side where the ball chased you. Soon you'll meet the Duke and Princess Lora. Follow him through the teleport.





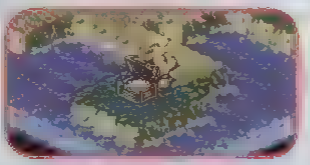
PART 12

THE CAVES OF KAZAIT

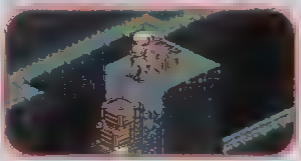


Prepare for horror and adversity beyond your wildest nightmare Explore the town stock ng up on supplies The entrance to the caves are bottom north-west In the early rooms you have to kill all the foes to open the gates Go south-east to reach a statue with a sphere in front Use a Gaia statue to destroy it Go down and you find the lantern Use this whenever you enter a dark room

Next look for the key that opens the next set of rooms to the south (the room with the spike floor and orange ogres) In the room with a switch suspended n mid-air use the crate to jump onto it Now go north-west There's a tricky feat required with a vase. It must be placed on the switch, but it shatters easily You have to jump and throw as you land — don't fall down the hole though!

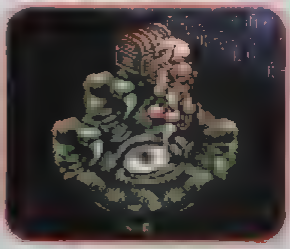


Now you can get the iron boots from the same room These allow you to walk on spikes Go north-west and up looking for a room with a path of spikes Hit the switch here Go down and along to the next trapdoor up When you come across a teleport tile, jump over and go south-east You ll come out into the open to get a key. The way back down is under the trees in the centre There's a treat in store in the form of the Sword of Go a When powered this has the effect of a Gaia statue — useful for kill ng foes from a safe distance



Find the next door to open Through here is a room with a switch that alternates two spiked balls Use the crate to help you jump over To the south-east is a room with three crates and a switch There's a chest on the high pinnacle Take the chests to the southern side of the pinnacle and p le them up on each other, switch on the bottom, to get up Take the key inside Go north-east, to the sprawling room with the skeletons Use the Gaia sword to destroy the green statues, then kill all the skeletons and activate the two switches

Leave the room by the bottom south-west exit Find the next door You enter a room with three holes Go through them in this order left centre and right, gaining access by placing the crates on the corresponding switches. The right one leads into the Fire Elemental's lair Before you go south-west to face him, go back the other side to retrieve the Venus Stone. This re-energises your sword very quickly Now kill the Elemental by standing n the safe bottom bit and using Gaia blasts — it takes time



After getting Gala's nail, don't take the te eport Go to the room with three holes and take the left one. Soon you're in room of strange hands. Move around this room by falling, and get the snow spikes These let you walk on the icy patches. Leave by the narrow edge in the top corner Now you want to find the gnome (retrace your steps to the last time you used a key and go south-east) He won't let you pass, so find his brother (locate a room with icy patches, use the snow spikes and fall down the hole on the left side) Now go back to gnome one, get the logs, return to gnome two and use the ogs at the end of the pier You need to make two rafts to reach the guardian. Kill him with Gaia blasts while staying out of his line of fire

Go north east and through the teleport, go south-east thrice and south-west twice, open the door and face Miro Again, kil him with Gaia blasts The way to Nole s final dungeon is open

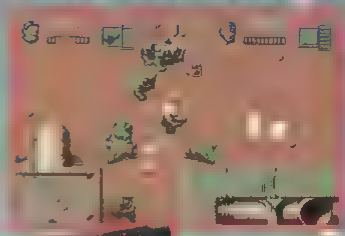
CHAOS ENGINE

17 September, 1878
My chronometer informs me that this entry has been made at 4 33am I have just spent an exhausting twelve hours in the laboratory grappling with what I hope will be the final problem with the Transportation Engine Previously, each manifestation within the continuum had been warped slightly, so elements of the machine, and even the mind of the user, had contaminated the surrounding plane By tinkering with the displacement coils I hope to have solved this

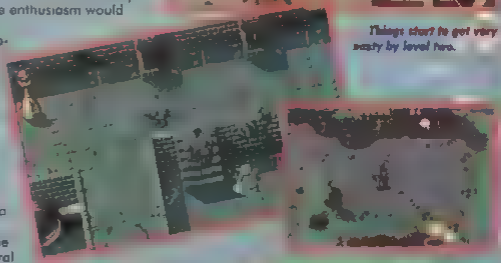
18 September, 1878
11:20am Despite sleeping fitfully, I returned to the lab early this morning. You'd think after many years of research my childlike enthusiasm would have paled, but I'm so close

9 25pm Yesterday's problems with the Engine have not been cured, I fear. The Engine allows time and space transportation via a series of nodes, which 'clasp' the planes of each time zone together. I have travelled through many such planes today to observe the effect of my modifications instead of inhibiting the contamination, it is more pronounced Creatures within the planes have developed visceral violent impulses and revolting appearances The landscape is tending towards Chaos, and the continuum degenerates by the hour, for beyond my ability to reclaim it

19 September, ?
I am trapped by the Engine It sits at the centre of the four planes This entry, sure to be my last is not dated time is meaningless within Chaos If anyone has yet the means to destroy the engine, do Unlock the nodes of each plane, and find the infernal device I beseech you
Baron Ilias Fortescue



Things start to get very nasty by level two.



COMMENT

Deadly digits of doom! The hands of fate condemn the warriors.

ENGINEERS...

Six curious beings offer their services to destroy the Chaos Engine. Each is supplied with a different weapon, and an entire battle profile of attributes. Inevitably, what some players excel in others lack.

...AND THEIR ATTRIBUTES

SKILL
The skill level limits the power value of the weapon and items like [illegible] carries.

HEALTH
Each health point allows your character to take one enemy hit.

SPEED
Player's speed of movement.

WISDOM
This only affects CPU controlled players. The higher their wisdom level, the more useful they make themselves.

WEAPON POWER
Affects the firing rate, amount of bullets and power of any weapon.

His rate is of average power, but has a long range. He's also speedy.

The head leader. Effective in all attributes, he carries a Gatling gun.

[illegible] not the most intelligent [illegible] companion.

An incredibly beefy character with a cannon of immense proportions.

PLANE TRUTH

The landscape of Chaos is set over 16 levels, cast in four types of scenery. The game starts in leafy, rocky countryside, with plateaus and bridge-crossed mud pools. Hideous mutant enemies team out of holes in the rock, or even appear out of nowhere. Later levels are set against a background of a mysterious urban maze and Fortescue's dilapidated mansion.

COMMENT

GUS

like this on the Amiga, except for that was two years ago. The thing is, this is typical Bitmap Brothers stuff. Graphics, sound and gameplay are accomplished enough, but they just don't seem that fresh or exciting, just like their other games. Gods, which was overlooked for the same reasons. But anyone who played Gods enjoyed a good game, I think.

Megadrive owners are so used to games being either brilliant or rubbish, they're a bit flummoxed by one like this, which is just good. The only inexcusable element is the scrolling, which is pretty jerky. However, this is still a very nice mix of fast shooting, exploration, teamwork and puzzle solving.

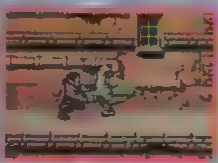
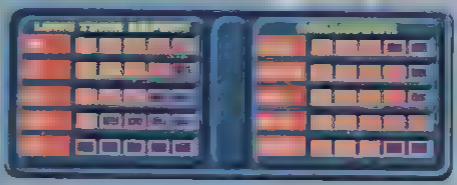
MISSES BRIDGES

COMPETITIVE ELEMENTS





PRESENTATION 83

▲ A reasonable intro, and a choice of skill levels. The 'extras' like the level analysis are all good ideas.

GRAPHICS 84

▲ The backgrounds are good, with some lovely layering. Enemies and sprites look good.
▼ A little drab in places, and the scrolling is noticeably jerky.

SOUND 85

▲ The in-game music is average to good even material. Not Yuzo Koshiro standard, but still adds to the action. The speech is quite clear.

PLAYABILITY 88

▲ Easy to get into, with a nice difficulty curve. It's Gauntlet-style action with less levels but greater complexity.
▼ Sometimes the speed and number of foes is erratic.

LASTABILITY 82

▲ The hardest difficulty level is very tough. There are six characters to explore.
▼ Chaos Engine is not a classic 'play and play again' sort of game.

OVERALL 86

It's neat, but it's expensive. Chaos Engine is not short on playability but really needs a little more excitement to meet the price.

HOW TO PLAY

Guide your little boy around the Mystic Mansion of the title, examining things and picking up objects.

MANSION OF THE HID SOUL

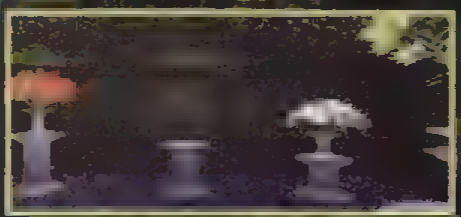
There is a Mansion where [illegible] in hushed tones. A mansion surrounded by legends of brutality, [illegible] death. A mansion now absorbed into the folklore of the [illegible] world. Its name is Charles Mansion, legendary sixties serial killer. There is a rather smaller adobe however, which is famous for the collection of blue butterflies which dwell within which doesn't sound nearly so menacing and, to be honest, isn't. I mean, which would you rather face - a crazed, bearded madman and his followers with their big long knives or an out-of-the-way old house full of butterflies? Doesn't exactly conjure up images of imminent doom and pant-soiling terror, does it? However, this is no ordinary mansion, this is the Mystic Mansion, and it is indeed a veritable butterfly factory, transforming all those who enter its walls into pretty flying insects. Your sister is one such unfortunate, and it's your job to rescue her in this impressive new FMV title. Mind you, little sisters are always a bit of a pain aren't they? I mean, you'd probably be better of letting her go, at least you could keep her in a jar or something. Still, that's games for you.

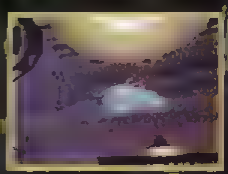
LOVELY BABY BLUE BUTTERFLIES

The only way to get out of the Mystic Mansion is to converse with the characters imprisoned within. These chaps and chapesses are in possession of many valuable clues and, by entering their rooms for a bit of a chinwag, you can make your job a lot easier. The only problem is, these peep e have been transformed into pret y blue butterflies so you might feel like a bit of a divvy converse ng with them. However, listen carefully to their badly acted vo ce overs to find out just what you're supposed to do next.

▲ This fab desk, lamp and flatpack butterfly display case — great value at £39.99

▼ Say it with flowers.





▲ Love is like a butterfly, soft and gentle as a glob.

When there's moonlight and music... oh, I admit it, these cutscenes are garbage, aren't they?

▲ Must be worth making this detour to pick out of apples and pears.

WHO'D LIVE IN A HOUSE LIKE THIS?

Each room in the Mansion hides an important secret. In fact, because it's actually more of a bijou council place with not many rooms, the programmers have had to consign about three or four important secrets to each living space. Once you think you've found a likely looking area, simply push towards it again to examine things more closely. If there's an object you can pick up there you'll automatically grab it and stuff it down your pants ready for further use. Beware, though, as some of the objects are red herrings and you'll find yourself lugging it around looking for somewhere to use a completely worthless thing.

▲ This week we look round the beautiful Tudor home of Jane Asher.

I'M NOT QUITE SURE WHAT THE ARTIST IS TRYING TO SAY HERE

If you're really really stuck and you haven't got a clue where to go next, head for the games room on the upstairs floor. Concealed on one wall is a set black painting. Hardly a fantastic piece of art maybe, but this is actually a magic painting and close inspection reveals a glimpse of other images. A shot of an item you need to collect or a location you have to visit briefly melds into view. Of course, this does tend to make things a bit on the easy side, but the strict time limit placed on your escape means you don't really have the essential minutes to traipse back up to the room after you've visited each location.

COMMENT

GUS

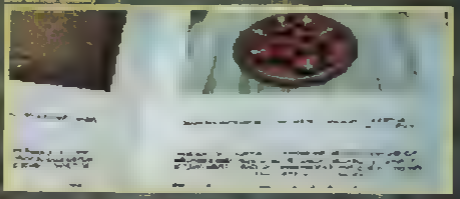
Like Rad, I was enchanted by this game at the beginning, with its phenomenal visuals and atmosphere. But the limited nature of the game dispelled that pretty quickly. Two years of toil have gone into producing a stunning first-person perspective with very smooth update, but where's the game? Two years work — and Rad finished it in a day. Something wrong there, methinks. The problem lies with the small playing area, and the fact that each room only has a few places to visit. You don't have free movement to peer under pillows or under tables. It's a bit sad to denigrate this impressive and innovative use of the Mega-CD, but Mystic Mansion strikes me as experimental. Fancy being a guinea pig?

FRANKENSTEIN

RAD

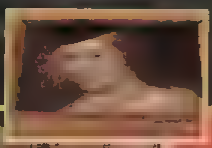
I must say, Mystic Mansion is one of the best-looking games ever to hit the Mega-CD. It really does show off the machine, with all of the backgrounds and such being perfectly rendered plus there's some imaginative use of the first-person perspective. The game itself certainly benefits from this – so absorbing is the atmosphere you can't help but get involved with the action. However, there are a couple of drawbacks. For starters, the gameplay is a bit shallow, consisting simply of searching locations and listening to butterflies telling you what to do next. The other problem is that the game is far too short. It might take you a couple of goes to complete, thanks to the time limit, but there just isn't enough there to last any length of time. As a showpiece, this is absolutely amazing and great, but as a game in its own right it's sorely lacking in depth

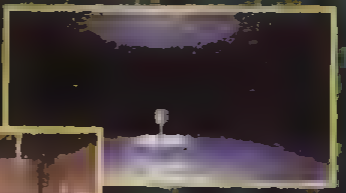
▲ Dear diary, I'm scared and I want to leave. Signed Alex. (Just wouldn't capture the same effect.)



▲ Up to the asbestos-filled boy lady.

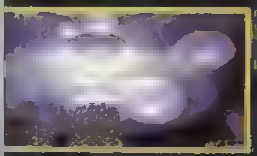
▲ Dolph complains at length about his lot in life.





▲ All hail the golden backside radiance of Thorgeon.

▲ I'm afraid of the light mummy.



PRESENTATION

92

▲ Insanely nice and gorgeous in-game presentation which really makes the most of the medium.
▼ No options.

GRAPHICS

94

▲ Absolutely great. The backgrounds are beautifully rendered and the attention to detail is phenomenal. Honestly, these are really nice graphics.

SOUND

89

▲ Huge amounts of speech for all the butterflies and characters
▼ The acting, it must be said, is very bad.

PLAYABILITY

82

▲ The atmosphere created by the visuals makes the whole mystery thing very absorbing.
▼ The actual game is quite linear and simplistic.

LASTABILITY

60

▲ You'd probably play this once more if you'd completed it, just to see it all again.
▼ It's just too short for its own good.

PGA EUROPEAN TOUR

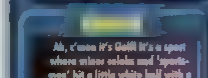
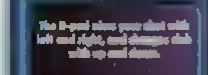
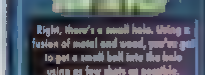
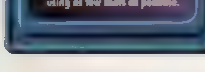
CONTROL: JOY PAD

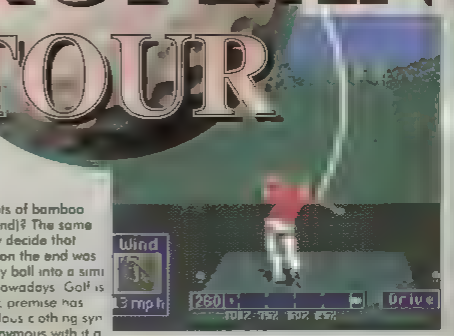








Most sports are across as pretty pointless when they come under close scrutiny. I mean, who decided that Rugby players can only pass backwards? Or that just to make Lacrosse a little different, it should be played with those fishing nets you used to be able to buy as a kid (you know, the bits of bamboo with red or green mesh stuck to the end)? The same goes for Golf. Just how did somebody decide that using a selection of sticks with lumps on the end was the perfect implement for hitting a tiny ball into a similarly tiny hole in the ground? Still, nowadays Golf is a big business sport. Although the basic premise has remained the same as has the ridiculous clothing synonymous with it a good player can become a millionaire overnight. Or they can even swallow their pride and play with 'big name celebs' for their own BBC2 show.



Still, EA know a good thing when they see one, and their latest addition to the PGA saga features five new courses and a handful of new Match Play options. Even so, the PGA series still has plenty of mileage and you can expect to see Mutant League PGA and Pro-Celebrity PGA real soon. Probably.

VERDICT

STEVE

Although in terms of playability PGA Euro is virtually identical to its predecessor, it still stands up as an excellent game in its own right. The new courses are crammed full of problems, and the Match Play and Shoot-Out ideas add even more longevity to a classic game. Control over your Golfer is simplicity itself, making a game which is easy to play yet constantly taxing thanks to the assorted sand traps and water hazards. That said, Euro still falls into the same trap as EA's NHLPA and Madden games - ie if you have one already, this isn't an essential purchase. The best Golf game there is, but only if you're a newcomer to the

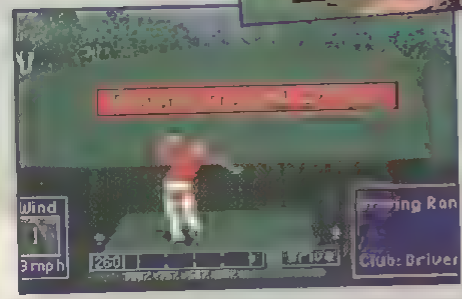
PLAY AWAY

PGA Euro features a number of play modes, each of which can be played by up to four people. And here they are listed in full for your delectation.

SKINS CHALLENGE This is where loads of big blokes with cropped hair kick the crap out of each other. Oops, no it's not. This is where each hole has a cash bonus attached to it. The first person to sink the ball wins, it's as simple as that.

MATCHPLAY Two human players are entered into a league system against the computer-controlled pros. Basically, three rounds lie between the player and an even larger bank balance. The Golfing equivalent of the FA Cup.

PRACTICE ROUND Select any of the five courses and fumble your way around.



SHOOT-OUT Ever played Pool and joined in for a game of Killer? Basically, everyone takes turns at potting a ball and if you miss one of your three lives is lost. If you lose all three you're out. Shoot-Out is the same, but the person who takes the most shots to sink the ball is the loser and doesn't make it to the next hole.

TOURNAMENT PLAY Taking you over seventy-two holes, over sixty contestants take part in the tournament - with wads of cash awarding the winner.

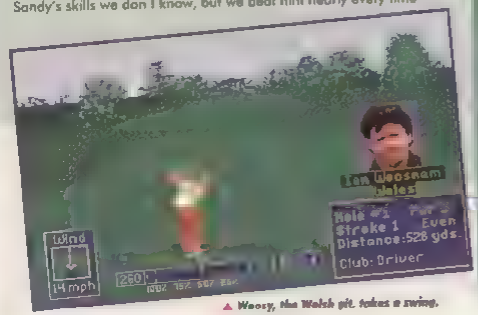
SANDY, CAN'T YOU SEE...

Once you've thrashed your mates, PGA Euro also has a number of Pros out to snatch the prize money from under your nose. In all there are ten professional players to choose from - including Bernhard Langer, Ian Woosnam, and Jose Maria Olazabel. Each offers a massive challenge, but it does seem that one player is easier to beat than the rest — Scotland's Sandy Lyle. Quite whether this reflects on Sandy's skills we don't know, but we beat him nearly every time.



▲ Woosy, the Welsh pit, takes a swing.

COMMENT

GUS

Yup, PGA Tour was a great game, is a great game and will always be a great game. PGA Tour Euro is much like PGA Tour II, ergo, PGA Tour Euro is a great game. But I don't think it's that much greater, despite new courses, better sound effects and more varied weather conditions. The classic nature of this sim doesn't fade. It's brilliant to play and offers a very long-term challenge. But if you already have PGA Tour II (or see it for a bargain price) then don't think you're missing out on [illegible].

PRESENTATION 90

▲ Loads of match options, ranging from a driving range to the full money tournament. In addition, you can choose swinging from your opponent to your right.

GRAPHICS 88

▲ Nice 'flying over' intro to each course, and the animation of the player is as smooth as ever. The ball movement is particularly realistic, too.

SOUND 56

▲ A few nice bird noises and a dose of the claps for good shots...

▼ Well, there's not much else you can do with a Golf game, is there?

PLAYABILITY 92

▲ How does that old saying go? "Easy to pick up, hard to master." Oh, yeah, that's the one. Never a truer word said...

▼ Games take a long time to play.

LASTABILITY 94

▲ The five courses should last even the most ardent Sony quite a while, and then there's the brilliant Shoot-Out feature to get to grips with.

OVERALL 93

The 'Turbo' edition of the best Golf game ever — and consequently, not worth the money-cash. The most playable Golf game we've seen, but a bit of a redundant purchase if you own the original.

Using Road Rash's engine, Skitchin replaces the EA game's motorbikes with rollerblades. The idea remains the same.

HOW TO CONTROL

The D-pad left and right positions control your skater's movements on the road. Up and down are used in the air..

- Grab, release
- Brake, change
- Combat
- Pause game/ select

HOW TO PLAY

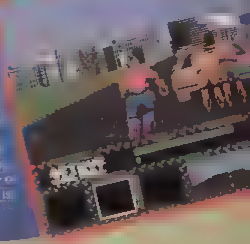
Skate around twelve cities breaking rules from passing cars, jumping ramps and beating up other competitors and, of course, trying to win the race.

What hope is there left for British culture? When are we going to see a good Morris dancing game? Will a software house ever dare release something like "Whippet Rash" or "Arthur Plumtree's Skittles '94"? For the moment things remain 'radical' rather than spiffing in the shape of Skitchin. Before a look of bemusement begins to consume your features I'll explain.

Skitchin is another crazy underground sport created by those crazy Americans. Competitors kit up in roller blades and race across twelve cities making use of everything that happens to cross their eight wheeled path. More often than not this includes motorists who unwittingly act as tow cars for the cheeky skaters. If another competitor decides to share your ride, their presumption should be dealt with sternly by the use of fists or legs or a weapon at hand this relieves much of the burden of using limbs. Hopefully they'll be left bobbing on concrete. Occasionally a ramp arrives which means it's time to get all poncey with a few tricks. Judges are always at hand to mark your more elaborate efforts with the reward of points for a good exhibition. And what do points make? Cash actually with the dedicated skater can use to get a better set of blades, pads and various other bits of kit. Making the top four will also earn you money and enable you to move on to another city. So for now its a case of "Yo dude, let's go thrashin' on the asphalt rather than "I say old chap, what would you think to a spot of garbage?"

BUMPIN CARS

Skaters which enable them to... vehicles approaching from... the rear. Once... a skater has collected... enough speed... they move into... the path of the... vehicle and grab... as it passes. Beware though, because... other skaters might decide to hijack your ride and here's where a bit of assertiveness is necessary.



I had a pair of roller-skates once...and a hula hoop...and a yo-yo...

Hmmm. Are EA losing a bit sneaky here? With a few little twists here and there they've [illegible]

Despite the similarity (it does after all use the same basic program as Road Rash) [illegible] own right. You'll get me most fun out of this in the early [illegible]

But the courses don't vary a great deal, and once you're familiar and relaxed with the game it seems to lose a lot of its excitement and the whole process gets a bit mundane and samey. This is [illegible] tends to make racing games far more exhilarating. But there isn't any effort to really change the concept of the racing game. If you don't already have Road Rash this [illegible] think Megadrive owners, while being intrigued by the action, are already too familiar with what Skitchin has to offer.

IF MUSIC BE THE FOOD OF LOVE...

EA have made quite a big deal of the fact that you've got sixteen tunes to choose from as you race but, to be honest, the concept isn't exactly new. All of the tunes are of a lukewarm thrashy style naturally designed to give that rough crazy street kid feel to the proceedings. The more musically deprived out there might find themselves air punching to the rhythm but most will feel the desire to switch the music off altogether after about five minutes.

A RAMP-ANT PERFORMANCE

In the words of the immortal Bonnie Tyler "I need a hero. I'm looking out for a hero 'til the morning light. He's got to be hard, he's got to be strong and he's got to be fresh for the fight"

Indeed Bonnie. Those were the days, when men got Brut for Christmas (and used it!) And only a real man could satisfy the likes of Bonnie, the gal — gargled with broken — glass before flossing with a wire coat-hanger.

But now we live in the age of John and Norma Major, Norman Lamont and Normy. It's fashionable to be useless in these stakes. Normy is unparalleled on the beach. He is to surfing what John Major is to opinion polls. So now that all the beach babes have been abducted by time travelling space aliens I guess there's not much to be done — unless Normy can get his act together that is.

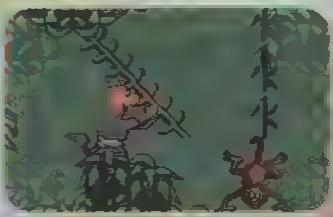
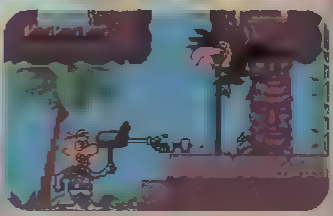
COMMENT

GUS

It's some sort of testament to the, this is it, Normy is the most dull, lacklustre and normal platform game ever constructed. I can't recall a more blatantly unadventurous and unremarkable cartridge. What's more, it seems to revel in it. The graphics are atrocious – [illegible] repetitive and simplistic – and they're matched with some awful music; a tinkly, pointless nonsense in the background. The humour isn't funny — sub-Wayne's World aunt-talk and digit gags, the sub-games are so secret you can barely find them, and the whole substance of the game is an island. It's not worth it. It's sad that EA are accepting this sort of standard from some of their developers. It does tend to tarnish the image cultured by games like FIFA.

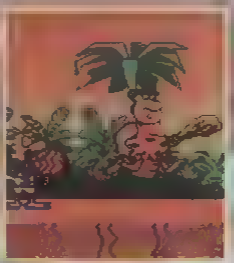


Normy swings in the rib tickling jungle sequence.



PATHFINDER

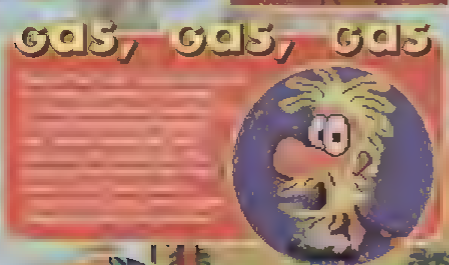
Normy faces the same hazards that many past platform heroes have, lava, dinosaurs, large chasms and water. All of these are styled according to the time zone he finds himself in, be it prehistoric, mediaeval or Aztec. Normy jumps between them with his patented time-travel hair oil.



COMMENT

STEVE

My, what a piece of mediocrity. Normy starts off looking like any other ordinary ordinary platformer you care to mention and continues space seemingly happy with its bland lot. Graphically, it resembles an Amiga game with a minimal colour palette and backdrops which contain nothing whatsoever of interest. Ok, so if there was a stunning game there to save it, BA would be able to breathe a sigh of relief. But there isn't and this dooms Normy to a life of unplayed obscurity. The sprite detection is duff, the sound atrocious, and the only way Normy will be remembered is when people read this issue in a few years' time and sigh with relief because they never bought this underfed platformer.



Arcade classics

Hidden with Normy's code are a selection of great and good coin-ops of the past. For nostalgia, challenge and plain fun try to locate secret sub-games like Asteroids and Space Invaders.

PRESENTATION 67

▼ A poor level, bland intro screens and a general feeling the game was lazily put together.

GRAPHICS 65

▼ Not cutting edge Megadrive visuals. Okay, they're meant to look naff, but Normy just looks like a dog's dinner.

SOUND 52

▼ Boring, boring, boring. Plinkety-plonk, clinkety-dink. If music is wallpaper, this is Honeywave in magnolia.

PLAYABILITY 60

▲ Moderately playable over the short-term, as all platform games are.
▼ Usually finished and iconic, even the prospect of stumbling on a hidden game doesn't thrill.

LASTABILITY 44

▼ It won't take long to complete, and you won't even find it interesting in the time it does.

OVERALL 53

Maybe this is one big joke, with Normy being normal, but it's on you if you pay £40 for it.

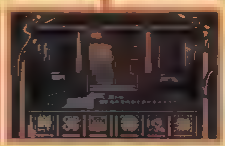
DRACULA UNLEASHED

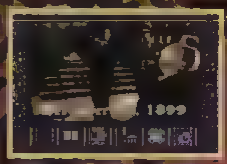
Alexander Morris has crossed the Atlantic from Texas to probe the death of his brother, who was living in London. The unfortunate young man had been part of an occult society called the Hades Club. Could it be that the eccentric members have some sinister connection with Morris' death?

If that wasn't enough, troubles have befallen Alexander's fiance, Anisette Bowen with the sudden death of her father. Although he appears to have passed away peacefully in his sleep, Morris is disturbed by premonitions he had of the event, and the advocations of his European friend, Van Helsing, who urges him to look to his own personal safety. Shadows and fog shroud a long-slumbering evil which now threatens to rise...

THE BIG SMOKE

There are lots of locations to visit around London all of which are listed in your journal, and new ones are added when important places are mentioned by characters. Your are conveyed around the city by carriage, an easy enough journey but not instant. Travelling swallows up useful time. Plan your journeys by clicking between points on the map screen.





COMMENT

Adventure fans should delight over Dracula Unleashed, since it's the best FMV adventure so far. The programmers have taken the novelty of Sherlock Holmes, seriously improved the presentation and added a whole new angle by placing items and puzzles into the game. There is a real sense of atmosphere as the hours race by and night approaches, with some good dream sequences. It is expensive for the amount of time it takes to complete, but Dracula Unleashed is strikingly original and works well.

DARK SECRETS

The game has a polished icon-based control system (rendered cleverly as stained glass pictures). These are used to transport you around London, keep an inventory, save the game and review your journal at will. To familiarise yourself with their functions, click on Van Helsing's icon for a tutorial.

COMMENT

STEVE

'We don't loike strayngers 'round 'ere, zur...' In fact quotes from country bumpkins are all that's missing from Dracula Unleashed. It's a Hammer film-style epic. Searching Victorian London for clues whilst laughing at the assorted cliched characters is a pleasant enough way to pass a few hours, and there's plenty of object-related puzzles to keep you going. I found myself initially pleasantly surprised by Dracula Unleashed and its Cockney cabbies and upper class twits, but even after the novelty of these started to wear thin, the adventure started to unfold and I wanted to find out the causes for the mysterious deaths. It's not quite up to the standard of Double Switch but, even so, Dracula Unleashed is one of the best Mega-CD titles to date

DEAD AGAIN

Dracula Unleashed looks a lot like the previous Infogrames game, Sherlock Holmes Consulting Detective, both with impressive Cinepak video graphics. The gameplay window is clear and simple, and disc access is rather impressive. The [illegible] and cursors are [illegible] you, they may be turned off.

▲ Sisters, indeed, never were more embittered rivals.

▲ Oh! I should never have had that red pepper dinner.

▲ Cameo performance by Mollie, star of TV's popular 'The Likely Lads'.

ICONS OF LIGHT

For the first time, objects feature in a FMV game, adding an adventure element. As you [illegible] possession: cloths, clubs, calling cards and parcels, for example. Using them, by keeping them in the 'to hand' box, is often vital to saving your life.

PRESENTATION 93

▲ The box opens to reveal the Cinepak disc and the disc access is speedy.

GRAPHICS 92

▲ Good FMV, and the sets don't look so cheap and corny as those of Sherlock. Lots of nice 'pasted' drawings.

SOUND 94

▲ Crystal clear speech, with nice touches like Morris creaking the lavatory door and the outdoor hooves. Excellent music.

PLAYABILITY 88

▲ A truly interactive movie, with the tension of a film and the challenge of a game.

▼ Not one for action fans.

LASTABILITY 80

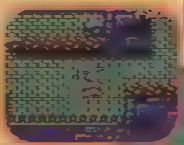
CJ ELEPHANT FUGITIVE

There now follows a Public Information Announcement. Reports have been filed of a cute miniature elephant having breached security measures at London Zoo. Although the whereabouts of the animal are still a mystery, keepers are going on the Stena Sealink receipt and Paris hotel reservation found in his compound that suggest he may be trying to leave for the continent and then Africa.

Speaking for the zoo spokesman Ernest Budgen said they had no idea why the pachyderm would abscond except for reasons of puerile publicity. "He had just signed a contract with a video game company, er, Codemasters or something," explained Mr Budgen. "I suppose all the furore surrounding the escape will help sell their platform game." Mr Budgen is 43.

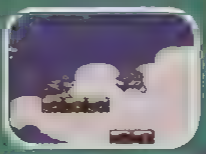
FRUITY!

CJ goes down in history as the first terrorist elephant. Behind that cutesy facade is a fanatical character capable of throwing bombs to aid his progress or even shooting lethal pearls from his trunk. In fact so shocked are the various sprites (Egyptian mummies etc) that he comes across, they immediately turn into a piece of fruit! Or even some more bombs! Bizarre.



SWEET HARMONY

CJ lets you come together in that most intimate of Game Gear pastimes, the two-player link. But instead of two-way elephant 'fun', this special option is a nifty little race game. Sadly you can't participate on your own but it's a handy thing to know.



COMMENT

STEVE

Oh, deary, deary me, I do believe I'm suffering from Deja-Vu! A game where a cutesy sprite makes his way across a series of dangerous countries? And the customary bosses making an appearance every now and then? Blimey, if CJ Elephant Fugitive isn't just a retread of every other platformer known to man, I'll eat my undies. Granted, it's moderately playable, but where's the originality — where's that little something to entice you further in? Not here that's for sure! Decidedly average.

COMMENT

GUS

Like sex, elephants never forget, but even CJ would be hard-pressed to remember this little romp. I have to say, I expected pretty banal. This sort of dull platform romp has been re-run to death and there's nothing new here. I was also annoyed that CJ kept dropping his bombs when I didn't want him to. The programming is competent, even some of the graphics are good, but it's wasted effort when the game is so shallow.

REACH LEVEL 3

Originally a PC title, Prince Of Persia has appeared on every computer/console known to man.

HOW TO CONTROL

The complex controls use the four D-pad directions to run, jump and fight, in combination with the buttons.

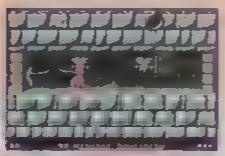
HOW TO PLAY

Guide Trevor through a series of labyrinthine dungeons, avoiding guards as he tries to find the Tower in an hour!

PRINCE O

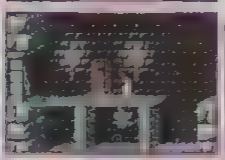
As with all Kings and Queens the time has come for the Sultan of the Persian Royal family to do the good will rounds, touring the nation hugging and kissing babies and ruffling the lice-ridden hair of peasants.

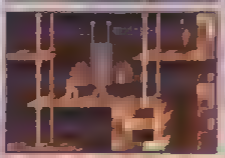
In his absence, the Sultan has left his right-hand man, the Grand Vizier Jaffar, in charge of the kingdom. But being a politician Jaffar is incapable of doing the right thing and before you can say "Jaffar! Jaffar! The princess snatcher!" that's exactly what he's done. Jaffar's plan is to marry the girl, kill the Sultan and steal the kingdom – and he's imprisoned the fair maiden deep in a dungeon in the Tower with only an hour to decide on his proposal. Thankfully, help is on its way in the shape of her beau (who we'll call Trevor). The player controls Trevor and now has one hour to find a route through the palace's dungeon to the Tower – but Jaffar's traps are a plenty.

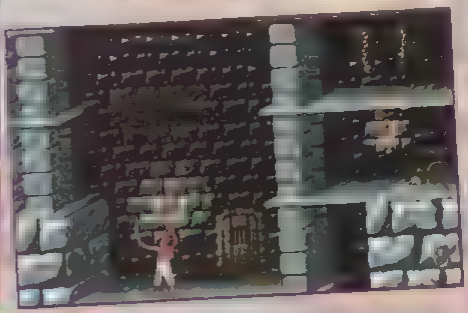


WHERE'S THE SWORD, MISS FORD?

Because the dungeon is littered with guards wielding very sharp sabres Trevor is going to need to use a little more than bad language to defeat them. Obviously the priority on the first level is finding a sword. Once this has been achieved our intrepid hero must test his mettle against one of the guards in order to move on to the next level. Developing good attacking and defending routines is therefore essential.

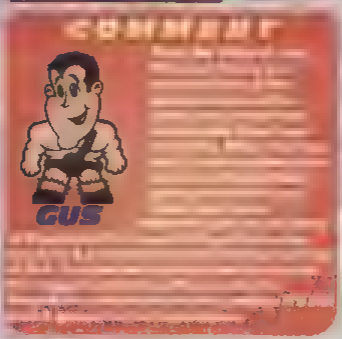






Trevor takes time to improve his Golf swing.

COMMENT



TRAPPINGS OF WOE

As well as harbouring a thriving insect community the dungeons are also full of traps which all too easily dispose of the unsuspecting novice. To begin with there are a number of floor tiles which are unstable. The tiles rattle as you walk across them to act as a warning – but don't hang around for too long. The same principle applies to certain ceiling tiles – if you jump up and push them they will vibrate. Often these tiles need to collapse before Trevor can find a route to the next level.

One trap with no advantages, however, are spikes. Look out for a cluster of holes in the floor because it's from these that the spikes snap up. Trevor must jump them or shuffle through them cautiously. Other things to look out for are guillotine blades and the pendulum which slice Trevor into cold meat slices.

F PERSIA

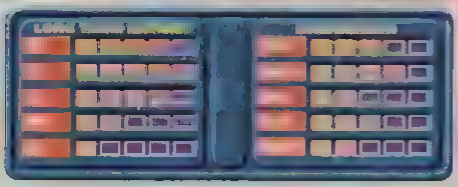
GIVE ME BLOOD!

In this age of censoring console games because of their graphic violence this one comes as something of a surprise. For some reason, the Megadrive version of Prince of Persia comes with a bit of added gore. For instance, when the heroic Trevor gets sliced up by one of the lethal traps, you can expect a more than your fair share of ketchup.

Sid the Seal meets a sticky end.

WALKING CAN BE FUN!

Unlike the average platform game the controls in Prince of Persia are a bit more complicated and take a bit of getting used to. Ultimately, though, they suit the realism of the game [illegible] tion of buttons with the direction pad. If Trevor attempts to jump a wide gap he needs a sufficient run up. Likewise when descending to a lower level it is often safer to lower yourself slowly rather than simply jumping.



COMMENT

As with the Football game before it, Mutant league Hockey simply doesn't gel. Whereas, NHLPA is a fast-moving game with large sprites and plenty of action, Mutant League Hockey is considerably slower and, for some unearthly reason, the assorted players are a bunch of puny, unimpressive weeds – these are supposed to be the toughest bunch of mutants in the galaxy! What it really needed were large players which really looked as if they were inflicting damage to each other via the assorted traps (all present). After all, a great deal of thought seems to have gone into the game, and the addition of weapons and traps does add appeal to the proceedings - but only for a while. Seeing a player trapped under the

CAREFUL WITH THAT AXE, EUGENE

In addition to the assorted mutants actually playing the game, EA have also beefed up Hockey's violence quotient. Whereas normal players are quite content to take off their gloves and hit each other, in Mutant League the players whip each other with their sticks and whatever else comes to hand. Tentacle? Talon? Feeler?! Getting into the violent spirit of things, the crowd throws axes, chainsaws and maces on to the rink and these are collected simply by passing over them whilst pressing the A button brings them into play. Conceded too many hits though, and your players either reduced to what appears to be Pea Soup or a cluster of bones at component parts.

COMMENT

STEVE

Although the Art of Fighting coin-op was nothing special, it was an entertaining enough beat-'em-up. This Megadrive conversion, though, is Art Of Fighting in name only. Gone are the fast-moving fighters and their skilful moves, replaced by badly-animated sprites which move so slowly it's impossible to string a series of moves together. In addition, dodgy collision detection makes landing punches and kicks a real chore, and more often than not your character never seems to be able to block an opponent's move. Such fundamental flaws make Art of Fighting look extremely dated and no fun whatsoever.

These are reduced slightly whenever a character performs one of their special moves, and, when fully depleted... well, [illegible]. Thankfully, [illegible] pressing of the C button can be used to replenish them, but this has the serious disadvantage of leaving the player temporarily defenceless.

When you cover no less than four basketball games in a single issue, you start to get in trouble with the review intros. We've covered the 'new-sensation hitting the nation' and the 'yo boy slam man in-the-house' approach. Now, the sensible question: why the sudden interest in basketball games?

There's the fashionable 'jam' type games with a couple of players and an old backyard, and the league type games with full rules and loads of official teams. Hyperdunk falls firmly into that category. So do the inventors of cute dwarf characters, Konami have what it takes to create towering athletes?

▲ See the names of famous cities up in lights — only in Hyperdunk.

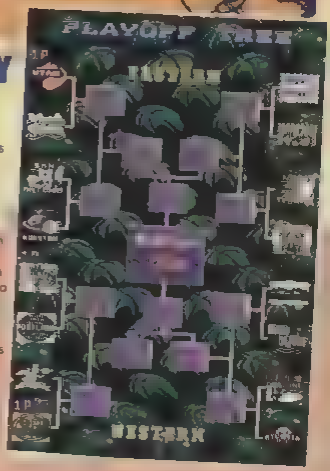
SUMMARY

GUS

Quite why all these companies have rushed out basketball games is beyond me. And now that NBA Jam has already fitted the bill nicely, any other contenders are going to have to pull something really special out. Hyperdunk simply doesn't. It's quite jerky, confusing to watch and lacking in any real sophistication. The front-end of the game is commendable, especially the eight player option, but it's doubtful most people will have access to that kind of equipment. NBA Jam has four players at least, plus nicer graphics, plus better playability. I can't help but feel Konami have some other areas sewn up so well that they should leave sports games to others.

YOU MAY CONFER

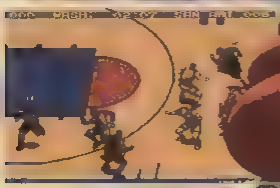
You get goggles of geese, herds of cows and conferences of basketball teams. In the NBA there are four but Hyperdunk features just two — Western and Eastern. With eight teams in each, you can opt to enter the 'Playoffs', a knockout competition leading to a massive prize. A password option has been included, as this might be rather a long task.



HYPERDUNK

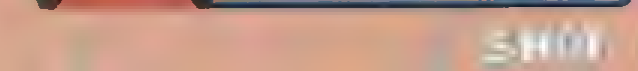
GROUND CONTROL

Hyperdunk is meant to be an arcade style game. In possession, passing is achieved with the B button, and the player selects his shooting style automatically. One feature is control when in the air. A successful basket depends on how you control the player after you've jumped. Hyper Dunk is also distinguished by allowing two four player leaps to be combined for an incredible eight player basketball jamboree. Get in the Quasi and cookie



WHEREVER YOU ARE

Basketball might look like a disorganised melee, but it's played almost as a tactical science. Each of the five-man team is designated to act as defender, mid-court or as an attacker. Of course, the biggest play [illegible] near the top of the court. You can judge for yourself on the set up screen, with a wide choice of players and all the relevant stats



COMMENT

STEVE Hmmm, well at least Hyperdunk's got a multi-player mode, I suppose. You see, after wowing us with Rocket Knight, Tiny Toons and Castlevania, I guess it was only a matter of time before Konami released a clunker — and this is it. Right from the start, Hyperdunk fails to impress. It's goudy palette resembles that of a Master System game and the sprites flicker rather badly as they peg it around the court. In addition, the scrolling is similarly 8-bitesque and jerks around barely keeping the action flowing. Everyone's entitled to a bad game or [illegible], so we'll have to let Konami off for this one — just [illegible] it that's all.

PRESENTATION 72

▲ Two-player mode on offer, and the bonus of a multiple player option.
▼ Presentation is not as polished or comprehensive as other Konami products.

GRAPHICS 69

▲ Reasonably sized player sprites.
▼ Poor choice of on-court colours, a sense of graphic clutter and unremarkable animation.

SOUND 73

▲ Speech and sound FX bolstering a basketball event.
▼ Opening music that grates quite badly.

PLAYABILITY 68

▲ The best fun is to be had with multiple human players.
▼ Excitement is the missing element of Hyperdunk. The game lacks a feel of any kind.

LASTABILITY 60

▼ Not really much to entice the casual player back. The gameplay is two-dimensional.

OVERALL 65

Hyperdunk is technically competent, but that's not really enough with some of the other sparkling basketball action available at the moment.

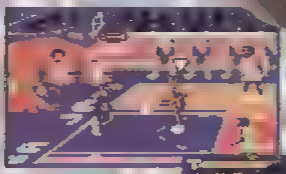
HOW TO SCORE

Get them balls in them baskets. Pronto!

It's the craze that's hitting the nation — NBA Basketball — the American import that's setting the home of every Brit on fire, assaulting our TV screens and being taken into our hearts... or something. Well, whether we like it or not, it's here to stay and this small screen conversion of the sport is one of the first in a series of basketball rip-offs currently headed for your Sega systems.

The aim (naturally enough) is to get the ball in the basket, fending off the overtures from the opposition who are equally intent on a similar goal. To keep things fast and furious, Acclaim has cut out most of the players and settled for a two-on-two format and armed our players with a series of super-human special moves. So go for those dunks, take aim for the lay-ups go for big-scoring three pointers.



Boom shake lake in da rim shakin' baby!

Slam that dunk tee-hee-hee-tap-pin' dewstown jam boy!

DEFENCE MECHANISM

As well as the shooting moves dunks where your player leaps up and slams the ball in the basket three po nters wh ch are scored from way back past the th ee po nt l ne on the pitch and lay ups wh ch are scored after bounc ng the ball agg nst the back board there are also a number of defensive moves like steal ng the ba block shots and push ng people over!

COMMENT

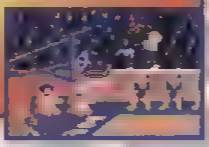
DECISIONS, DECISIONS

Since most of the twiddly rules usually found in basketball have been dumped from NBA Jam for the sake of speed and simplicity the game has lost a lot of its depth. However, to compensate for this the team select screen is an elaborate affair. The abilities of each member of each team are shown in bar form, each man being judged on passing and shooting ability, speed and so on. Watch out though cos one of your men might be a virtual superhuman whereas his team mate might be a nine-stone weakling who cries when the ball comes near him.

Yip smackin' thirst quenchin' bottom burpin' Pepsi!

COME ON BABY LIGHT MY TURBO

Each player in the game has a Super Slamdunk which is produced with the aid of a little Turbo bar. Pressing the Turbo button increases the player's speed until this bar starts to zero. Once the Turbo button is released the expended energy begins to replenish itself. Press shoot while the Turbo's close produces an almost unstoppable shot with superhuman leap way in the air. If the player scores three times on the trot he goes "on fire" which gives unlimited Turbo until his fire is put out.



COMMENT

Obviously, this little ol' handheld version is never going to measure up to the glitz of the Megadrive game, but, even so, NBA Jam is a cracking little slam. Most of the moves of the original are there – it's a little hard to see at times – and the small player sprites are surprisingly well animated. What's more, it plays at a fair old lick, too, with the players legging it up and down the court like there's no tomorrow – and some of the shots they pull off are nothing short of incredible. If Game Gear NBA is open to criticism, though, it is in the sound and lasting appeal departments. The former is nothing short of dire with just a handful of farts and burps supposed to convey the arena atmosphere of the real thing. And in terms of lasting appeal, NBA is rather too shallow and, unless you have an opponent with a second handheld to play with, you won't be playing this for longer than a week or two.

That is one high ball — work everybody!

PRESENTATION 94

▲ Excellent! Masses of teams to choose from an with a mass of useful stats. The coaching tips are smart too.

GRAPHICS 91

SOUND 77

PLAYABILITY 87

LASTABILITY 74

▲ Twenty-seven different teams to plough through...
▼ ...But the action becomes repetitive all too quickly.

OVERALL 76

BARKLEY SHUT UP AND JAM

Accolade join the busy basketball scene as they team up with 'Sir' Charles Barkley for a couple of games of two-on-two. Seven American street scenes house the courts, and you have sixteen rough'n'ready 'homeboys' from which to select a partner. Each player varies in their abilities, with some particularly accurate at scoring three-pointers but useless when it comes to withstanding a tackle.

The main aim of the game is to make your way from the streets to take on 'Sir' Charles and his masterteam in a nearby arena. Thankfully, though, the referee is conspicuous by his absence so it's theoretically possible you could cheat your way to victory.

COMMENT

STEVE

As with NBA Jam, Shut Up And Jam's greatest fault is in its lasting appeal. There's no faulting the options the game offers – there are plenty of players to pick from and the courts are nice and varied – but at the end of the day legging it up and down a two-screen-wide court gets repetitive, no matter how many players you get to do it with. That said, while it lasts, Shut Up And Jam is fun: the players have a number of impressive shots and its very easy to pick up and play. However, these factors fall by the wayside when you consider you probably won't be playing it in a week or so.

Given the choice between the rather gloomy Hyperdunk and NBA Showdown '94 and this, I'd rather plump for Barclay Okay, it's got the same holding power as daytime TV, but for those with a passing interest in the game, it's got more pace and more fun. I think you'd be nuts to by ANY of these games without at least one human opponent, which seriously extends the lasting interest. COMMENT

In a month where we've been inundated with basketball games, it strikes me that games which opt for a more 'arcadey' slant suffer from a lack of lasting appeal, whilst simulations which try to be as accurate as possible are as dull as dull can be – and EA's latest is the perfect example. Whilst it may indeed be extremely realistic and comprehensive, it sorely loses out in the playability department. If NBA Jam is the Harlem Globetrotters of basketball games, this is the Anthill Mob..

COMMENT

GUS

Life's a bitch, right? EA produce workable basketball games for years when no-one else gives a monkey's, and then NBA Jam comes out and makes mincemeat of their new contender. The problem is that EA have failed to keep up with the times or the mood. NBA Showdown is just too heavy on game rules and not so good on gameplay. The game plays more slowly than Jam or Berkeley Although there's more strategy with five on court, it just ain't as fun. Sorry guys, but this isn't a winner.

Faint heart never won fair lady – so all you hello wannabees with pace makers get out of the queue. Fortunately there's nothing faint hearted about our Aladdin although anybody who says they don't get flutters in the chest region when they watch a whopping great Genie emerge from an itsy bitsy lamp has either got to be a liar or an imbecile.

Judging by laddie-boy's response to aforementioned scenario in this game (ie an inspired 'what's your name?'), the latter seems more probable but nobody ever said a hero has to be a candidate for Mastermind. In fact if you think about it most heroes have got to be pretty dumb: what intelligent person would go charging willy-nilly down to fight something like a dragon singlehandedly, just to rescue some dumb maiden? I'd say 'sod 'er, there's plenty more fish in the sea!' Fortunately, Aladdin has guts which allow him, in this game, to try to rescue the fluverley Princess and grab the lamp back off the evil Jafar who conned him into nabbing it from a sacred cavern, via a magic carpet and stacks of pretty platform levels.

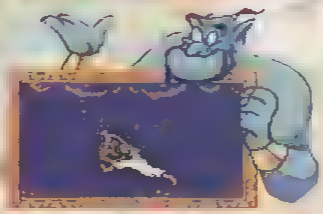
WOOLLY JUMPER

Much of this Master System version is spent leaping over obstacles and holes in the ground or avoiding falling ornaments during the fast-scrolling levels. However, there's also a certain amount of puzzle solving, battering baddies with rocks and a number of pretty animated sequences in between. Here's a run down of some of the perils you'll encounter.

THE MARKET

After half-inching a loaf of bread in the market, Aladdin runs, runs like the wind away from the angry trader who's hot on matladdie's heels as he races through the market, avoiding rolling barrels, falling urns and holes in the ground.

"Quick, nick all his fruit whilst he's busy doing the Highland Fling."



CAVERNS OF WISDOM

As can be expected, the journey to the treasure room ain't easy. Bats go for the jugular, spikes pop up in the strangest places, boulders fall from the skies, and fountains shoot from nowhere. Additionally, keys are needed to open doors and tight gaps must be slid under with a rather nifty special move.

COMMENT

LUCY

Aladdin is undeniably a pretty game to [illegible] – especially for the Master System. The between-level sequences are excellent and really make you feel like you're experiencing the story rather than just playing a game. The graphics are spot on and within the [illegible] there's a bit of variety in the fast-moving gameplay to keep you interested (the magic carpet section is particularly fun). However, like so many games before it, Aladdin suffers from being too easy — only one skill level which, with the passwords, will have most people racing through the game in less than a day and that ain't worth £30 of anybody's money. When will these programmers learn, eh?

PRINCESS OF FLIES

After thoughtlessly giving an apple from a nearby market stand to a kid the Princess is accused of theft and is only saved when Aladdin chucks his monkey in the face of the angry trader. A Princess leg!

Ooh, Aladdin what have you been doing to the Princess to deserve this sort of palava, you naughty boy?!

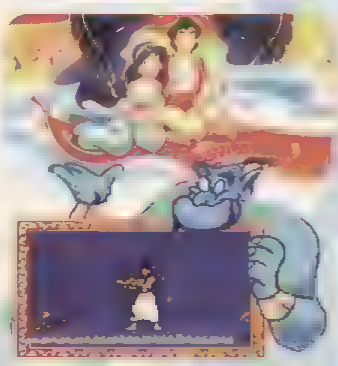
The Princess has a bit of a weep when the evil Jafar tells her that he's lopped Aladdin's head off. The lying git!

An old man promises Aladdin release from his prison and persuades him to fetch a magical lamp from the treasure trove. Because [illegible] prison, [illegible] seems to be [illegible] as like!

Aladdin and his Princess have a bit of a pukey smooch as the admire they view of the city

THE TREASURE TROVE

On discovering the treasure room, directed by a magic carpet Aladdin wades through the treasure But if he touches ANYTHING except the lamp he immediately snuffs it.



Jafar snatches the lamp and tries to chuck Al off the cliff, fortunately the magic carpet saves him and his monkey nicks the lamp back which is duly rubbed to produce the Genie

CARPET FLYING

Now we come to the fast-paced really bit where Aladdin steers his magic carpet through a fiery cavern, avoiding any obstacles thrown his way

PALACE MAYHEM

Aladdin is whisked to the palace where he chucks rocks at guards and collects keys which open doors and should eventually lead him to the Princess But will it be as easy as it sounds.

Aladdin is transformed into a Prince to help him get a better crack at the Princess Not that she's fickle about her fellers

COMMENT

GUS

When the Megadrive version of Aladdin was released, its most impressive feature was the fabulous graphics. Surprisingly, the Master System version shares that same visual extravagance. The gorgeous backgrounds and animation are all of an exceptional quality, and really captures the movie's atmosphere. I'm not so sure about the game. Instead of one gameplay, Aladdin comes in little separate bits — running sections, platform sections, adventure sections. The plus side is variety for the player, but the downside is that each section is pretty basic and not that exciting in itself. It's also too easy, which is convenient for reviewers, but not much fun when you've shelled out thirty greenbacks for it.

WHOPPING COLUMNS

Lots of options and quirky features AND five-player option. Wow!

Nice blocks and so... that's it.

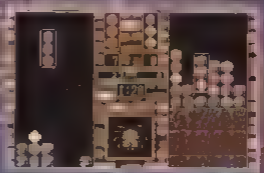
Crap music but some good block noises.

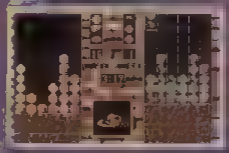
Easy to get into and a joy to play.

Almost limitless fun for two or more players.

OVERALL 85

Still a classic game but not quite as advanced as it could have been.





DEVIOUS DEVICES

STEVE

I didn't mind Columns, but my true affections went to Doctor Robotnik's Mean Bean Machine (AKA Puyo Puyo). It somehow seemed to play a little better than Columns, and offered more of a challenge. Now with Columns III arriving, and leap-frogging Columns II in the process, it offers a host of new features and touches. However, despite these, it still doesn't have what it takes to depose those cutesy jellybeans from the top of my puzzle pile. The five-player mode is the nicest addition and the action is a little harder than that of the first game — but I still reckon ol' Robotnik reigns supreme.

LUCY

When it was first released, if I could have married Columns and had its children I would have done — it's one of my fave games of all time! But that was three years ago and although it still remains a bit of a classic I would have expected a lot more of this sequel — coming, as it does, three years after the original. Okay, so you've got the five-player option which is a scream, and lots of little extras giving you more ingenious ways of beating your opponent but there's nothing really to warrant buying this if you have the original. It's still a stonkingly good game,

SUB TERRANIA

◀ Kill the Nazi zukes!

▲ Sometimes the cover resembles a tropical fishtank

Shoot 'em ups on the Megadrive are few and far between of late and decent ones even more so. Sega are now hoping to redress the balance with a neat little offering of its own which boldly goes where no shoot 'em up has gone before (allegedly). It's called Sub-Terrania and we got our mitts on it. Tee hee!

Hokey kokey, so what makes Sub-Terrania so different? Well it sure ain't the plot. Like billions of games before it, the storyline runs along the lines of aliens attacking some God-forsaken mining site having developed a grudge against the human species in general. You, as a full-blown super-hero in your trusty experimental attack ship, have been chosen to launch the counter-attack, wipe out the aliens and save mankind. Phew, how's that for originality, eh?

The 16 MEG cart has certainly been packed with lots to do, the most important of which literally being mastering the controls as there's this little thing called gravity which, if left unchecked, has you drifting down onto unpleasantries and an untimely death on the surface. To combat this, you get a couple of high-powered thrusters which ignite to keep you airborne. Add to this a whole host of ground-based weapons to pick up and master – different missions will require different weapons to get through and you have what promises to be an extremely taxing game indeed.

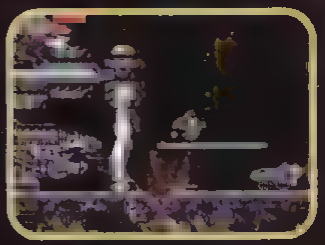
Although from what we've seen so far, many of Sub-Terrania's promises are looking fantastic, on the gameplay front it seems like it's going to be a bit of a scorcher. We'll fill you in with a full review in the very next issue of MEAN MACHINES SEGA!

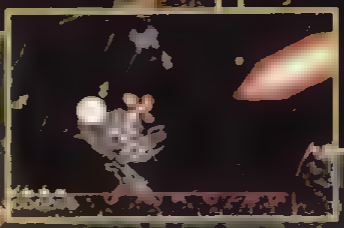
PRETTY POWER-UPS

A shoot 'em up without power-ups would be like fire with no smoke, and Sub-Terrania is no slacker in this department. Dotted around the landscape are plenty of power-up weapons designed to make life a little bit easier, including guided missiles (which come in handy for dealing with the enormous face-creature from hell located in level two), a shield revitaliser (essential to stop you disintegrating under the persistent attack of the enemy) and a fuel booster because if you run out of fuel mid-mission it's curtains for you, my son!

THINK ABOUT IT

Although some of the missions are relatively simple rescue assignments (find the blokes stashed away in an obscure corner and return them to base), Sub-Terrania is in many ways a thinking man's shoot 'em up. This is illustrated as early as mission three which involves picking up several mirrors and positioning them correctly. Then you need to fire an enormous laser, which duly reflects off the mirrors and blasts its way through a massive wall – whilst you simultaneously fend off the numerous baddies moving in for the kill!

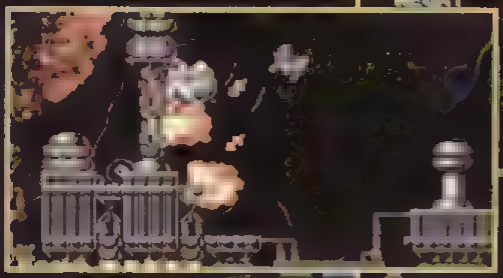


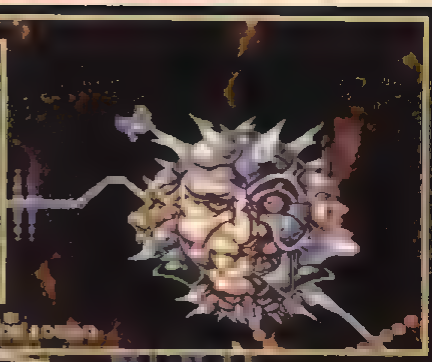


▲ Mirror, mirror, on the ground, I'm so glad that I have found (you).

SUB-TERRANIAN ALL-SORTS

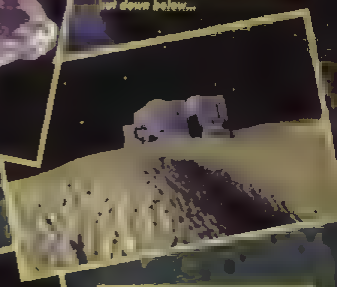
Having 16 MEGS to play around with has given Sub-Terrania programmers the chance to pack in loads of different features per level. For example, in level two you can save your foe by making use of magnetic rails that run their course around the level. These suspend you in the air without the need for "thrusting", as it were. Later levels feature even more amazing backdrop aids/hazards — some caverns are given sub-merged in vast [illegible] — and the jaws of gravity are adjusted accordingly should you dare venture into them.





ALL NEW?

Sub-Terranie is an update of a very old coin-op called Gravitor. Controlling a small spaceship, Gravitor basically dropped the player into a series of alien-infested caverns in search of a pod which had to be located and saved as the planet surface. The coin-op technology was almost identical to that of the old Asteroids machine, with vectors used to depict the triangular ship and the jagged tunnels within the planet. The last decent version of Gravitor appeared under the name of Thrust from budget label Firebird for the C64 a few years back, but Sub-Terranie has added a series of new ideas to the basic theme to bring it bang up to date.



▲ Some of you may notice the similarity between this and the boss for the Saturn coin-op.

▼ From the surface it all looks quiet, but down below...

KICK OFF 3

Although FIFA reigns supreme in the Megadrive Football League, that hasn't stopped countless contenders vying for glory. Accolade came and went with Pele, Codemasters' International Soccer has fallen by the wayside, and the Ryan Giggs game is currently being tinkered with by the busy guys and gals at Acclaim. However, Imagineer, are set to enter both the Megadrive and Football scenes as they announce the third in line of what must surely be THE most famous football game to date: Kick Off!

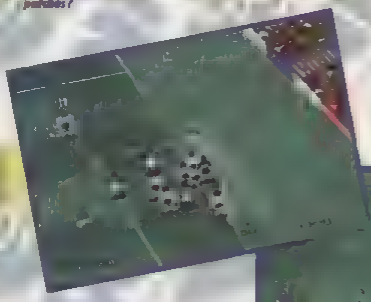
Yup. Imagineer are currently putting the finishing touches to Kick Off III, which promises to take the basic playability of the Amiga original even further whilst completely ignoring the steaming great pile of cack that was Super Kick Off. Imagineer's game abandons the original's overhead viewpoint, and uses a side-on viewpoint with the players legging it around a pitch which spans roughly seven screens. Every aspect of the real thing has been coded into the game, so you can expect off-sides, backpass rules, and defensive walls to appear in all their pixelated glory.

Kick Off III has yet to be set a release date, but we at MEAN MACHINES SEGA are the first to see what could be one of the best Footy games of '94 and wanted to share it with you. We're good like that.

▲ Who knows the significance of the three light-green patches?

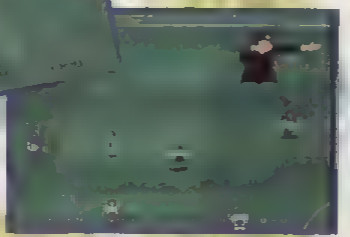
THERE'S ONLY ONE KEVIN KEEGAN

During the course of the game's development, Imagineer were determined to make sure Kick Off III was as realistic as possible. To this end, they drafted Newcastle United's Manager, Kevin Keegan, to help them formulate a number of set-plays which can be put into practice during free kicks and corners. Keegan's knowledge of the sport worldwide, allowed him to offer a number of attacking ideas which the computer-controlled players will try to put into practice. Imagineer hope that, ultimately, this will ensure the players won't act as stupidly as those in most Footy games.



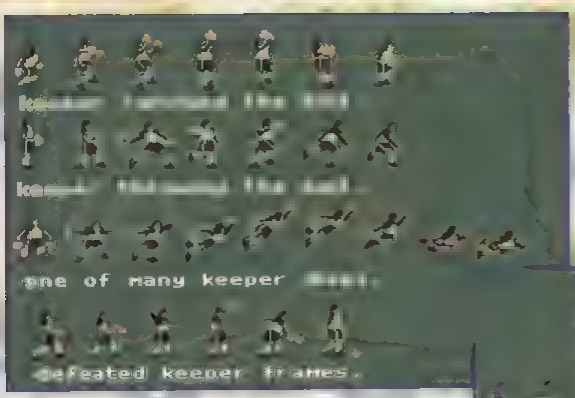
▲ Looks like someone's about to be taken, if my eyes don't deceive me.

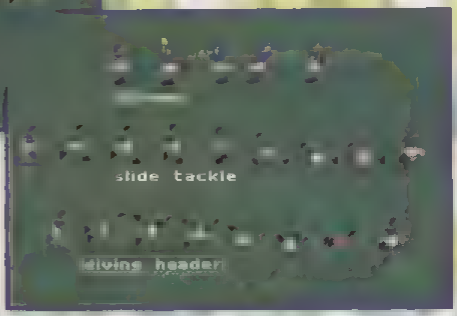
▶ Games action shot in this action packed screen shot



LOVELY MOVER

Kick Off III's players are kept moving by over 2000 frames of animation. Depending on the proximity of the ball and the height when the kick button is pressed, the assorted strikers and defenders can be made to effect diving headers, bicycle kicks, chips, flicks, and other such little Giggs-esque moves. In addition, the goalies are also slightly more intelligent than your average pixie-boxed 'keepers, and as well as the usual dives and kicks, they can tip the ball over the bar or simply get in its way to block a shot.

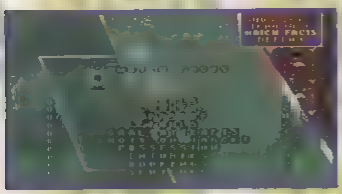




▲ This isn't pies and bovril, this is ballet man.

IT CAN DO THIS... AND THAT...

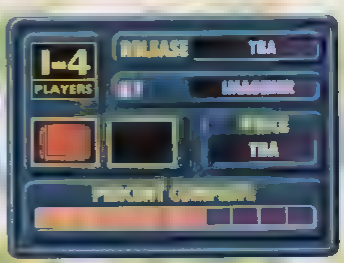
In terms of options, every aspect of Kick Off III can be tailored by the player. The match length can be anything between 2 45 minutes a side, you can select just how well the ball sticks to your player's feet, and there are 32 international sides on offer in a number of tournaments -- the only way England will ever get to lift the World Cup this year! Kick Off III also features arcade and simulation modes, with the former acting as a general kick-about to let you familiarise yourselves with the controls, whilst the latter adds a full complement of rules.



▲ Stroboscopic sprite displays ahoy! Just look what these guys can do.

DER MANAGE-MENT

If your team are playing particularly badly not only do you control their on-screen movements but you can also boost their morale Yessiree simply by coming up the managerial menu by pausing the game you can select one of a number of big boss options. These include the customary substitutions and tactic changes, and Imagineer have even gone so far as to add mood-boosting shots or the ability to shout at your slacking players!



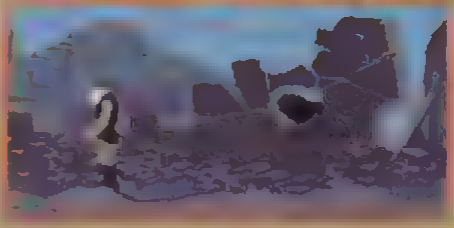
ANOTHER

One of the worst parts of growing up was watching Dr. Who. No really, the programme was great, but the worst bit came at the end of the episode when some jelly tentacle has got hold of the Doctor's assistant and then the wibbly bit of music came and the titles started to roll.

TV types like to call it a Cliffhanger. It's meant to make you watch next week, but it was flippin' annoying considering 'Who adventures came in four parts. Gamesplayers may have felt similar feelings when witnessing the end of Another World on the Megadrive. After that big bird lifts off, where do they go? Does Buddy take him back? Does he have to click his ruby slippers together three times and say "there's no place like home" ?

To know the answer to this you'll have to invest in the CD version of Another World. Rather than just stick on a 'CD-quality' soundtrack, the lads have created a whole new instalment of the saga chronicling the time after they land. Not only that but the full original is included, making this effectively Another World I and II on a double bill!

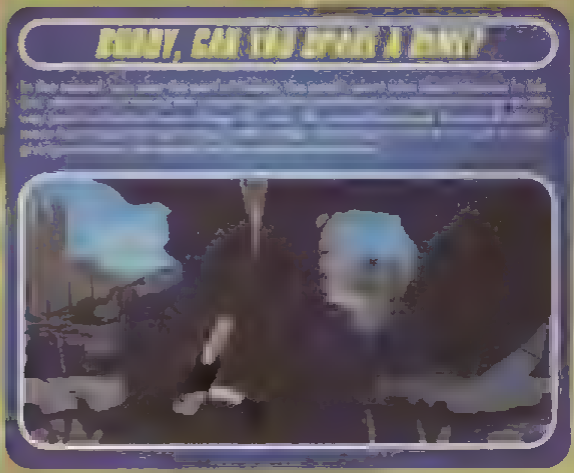
These pics show just how close to the look of the original the new version is, but Another World II is not without its innovations and surprises. Graphically, the same high standard of animation applies, along with some novel perspectives. So try to hang on for our full MEAN MACHINES review. Well, that's one cliffhanger problem solved. And, returning to that earlier matter, if you catch the UK GOLD satellite channel of a Sunday morn you can watch entire Dr Who adventures at a single sitting!



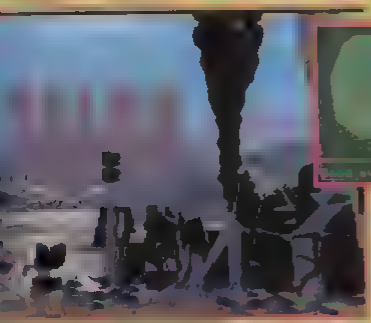
It's the monster from Another World. Prepare to flee!

Notice those translucent wings. Cool.

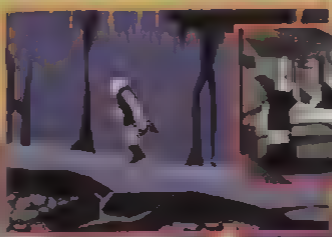
Yet another world with the forcefields of doom.



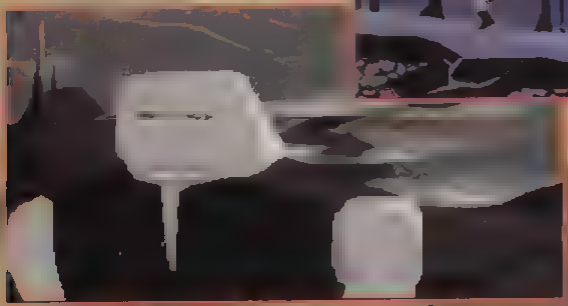
ER WORLD II



Alas poor Lester, I knew him...well I only just met him.



Cindy and Hawaii don't really need to watch their backs...



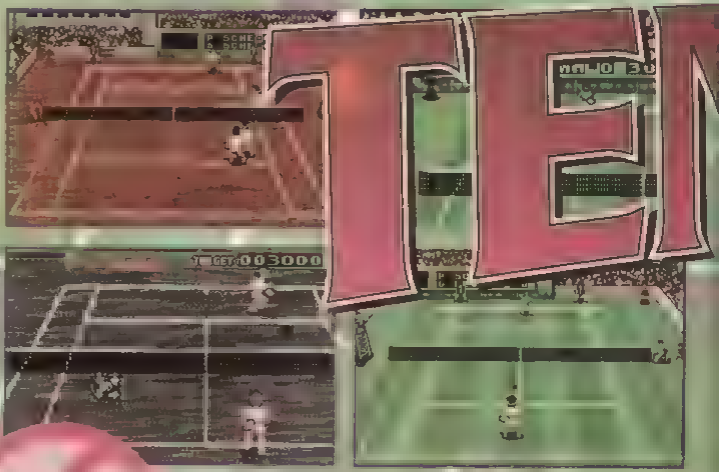
NEW PERSPECTIVE

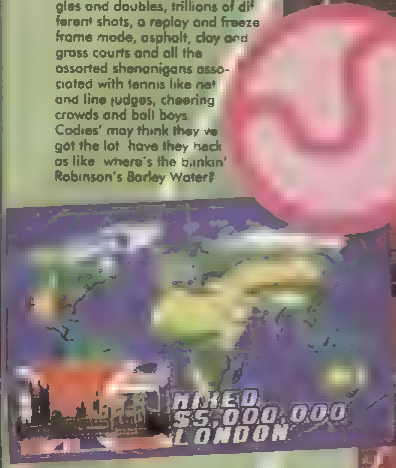
The [illegible] Perspective for [illegible] three [illegible] screen [illegible] screen [illegible] laser beams appear to be coming out of the screen.

I know the policy with these flippin' preview intro thingies is to explain the point/ plot, rules of the game in question but if you lot think I'm going to waste my time explaining the rules of tennis when it originated in the UK, you must be off your rockers [Yes Steve, I know we haven t won anything at Wimbledon s nce Noah launched his Ark or thereabouts but even so .. oh all right then. I] Tennis s a game whereby the aim is to bash the ball over the net without knocking it out and generally stuffing your opponent This sport (coincidentally enough) is the subject of Tennis All-Stars a sparkly new Megadrive game from Codemasters Only, as with most Codies stuff, this is tennis with a twist

Okay, let's get one thing straight it's called Tennis All Stars but right now that's poppycock 'cos Codies haven't found a suitable licence to tag onto it at the moment Whether they will or not is irrelevant really 'cos with or without a big star name it's always going to be the same game so don't get carried away with the hype!

From what we ve seen so far it's going to be a bit fab — packed with loadsa features including three types of tournament (Challenge, World Cup and Tournament modes), up to 62 international tournaments to conquer, male and female singles and doubles, trillions of different shots, a replay and freeze frame mode, asphalt, clay and grass courts and all the assorted shenanigans associated with tennis like net and line judges, cheering crowds and ball boys. Codies' may think they ve got the lot have they heck as like where's the bunkin' Robinson's Barley Water?





It's our very own London, God 'elp yer guvnor.

FOUR IN ONE

The most revolutionary thing about this game is that rather than have to blow £20 or so on a Sega Tap to get some four-player action, this game has two extra joypad ports fixed to the actual cart into which you plug yer pads and play-away All for £39 99 — can t be bad eh!

IZZY WIZZY LET'S KILL DIZZY

Just in case you get bored of playing straight tennis, Codemasters' have very kindly included a wacky mode appropriately called Crazy Tennis. This has you thrashing around the court in the normal way but this time picking up icons to give you tennis with a difference. Balls become the size of beach-balls or peas, there's a speed-up and slow-down and a really neat one which throws your opponent's control method completely out of synch — or your own if you're not careful. A hand of fate also pops up occasionally and takes your shot for you. The best bit though is definitely the chance to waste Dizzy who ambles around the court in his annoying eggy way. One hit stuns him and earns you loads of points, hit him while he's down and he disintegrates before your eyes absolutely brilliant!

Play the 'dodge the bread-knife stalker' sub-game.

It's that console and computer hero, Dezil! Hurrah!

BRETT HULL HOCKEY

Hockey has never been a massive game on these Isles. Well, not among the Southern softies. The Celts have always known how to have a good time with a bent stick in the grand old game of Shinty, which involves battering your opponent about the legs with a walking stick whilst occasionally striking a small ball.

In America the concept was inevitably twisted. The violence remains, but the new angle is the playing surface: ice. In a nation mad about spectator sports, ice hockey receives some of the most rabid support. All the elements are there — injury, speed and lots of action. Also, all sports need heroes, and Brett Hull is the current undisputed luvvie of the ice hockey fraternity.

Which neatly explains why Accolade have signed him up for their new ice hockey sim. The third in the Accolade Sports series (after the debaculous Pele and Charles Barkley's basketball), Accolade claim that Hull's contribution is more than a gap-toothed grin on the packaging. Consistent with their game series, he adds his expertise to the game design.

At the moment the cart spec is impressive. There's a wide-range of game options, including a huge 84 game season that may just take a few sessions. Luckily, a battery back-up is provided to keep your teams and their stats. All sorts of coaching options and a shoot-out practice take up the space. At the heart of the presentation Accolade promise a fast-moving, high-scoring and fun game. Will our reviewers say the same? The imminent MEAN MACHINES review will reveal all.

Life can be strange. Life can be very strange. It follows no linear path, and it's little intricacies and foibles keep us attentive at all times. There is no logic to life either. After all, if there was, why are Richard and Judy on TV ever weekday morning? And who decided Philip Schofield was worth paying thousands of pounds for to move over to ITV? Thus, with so many hazards to be faced in everyday life, it's surprising that we manage to make each issue of MEAN MACHINES SEGA so good.

However, if this ever-changing and constantly perplexing life, one thing can be banked on: MEAN MACHINES SEGA's May issue is going to be nothing short of excellent. Rare diseases and Elephant stampedes withstanding, we'll have reviews of Virtua Racing, Subterrania, SoulStar, and Body Count, with a further stack of latest releases in the background vying for our attention. Oh, and providing a plague of boils don't sprout on the ends of our fingers to stop us writing, we'll also have the greatest batch of previews you're ever likely to see. Honest, some of the stuff we've got lined up will fair curl your hair...

So, if you want to add a little reliability into your life, reserve your copy of the May issue of MEAN MACHINES SEGA right now. It's got everything a Sega owner could possibly want. And more.

MEAN MACHINES SEGA — THE ORIGINAL AND STILL THE BEST!
